vs the Lone Star Open 2026 field · 324 lists / 117 archetypes · 120 games/matchup · **Version 2.0 · 2026-07-30**

Your locked disposition: **purge-the-foe**

Read this first: the **VERDICT** + *how-to-play* are hand-set from the Knights seat — that is the plan. The **Sim** column is the positional simulator: **directional only** (it over-credits you in melee and vs reanimation/hordes), a cross-check, not a prediction.

Runbooks — top 14 archetypes

Shield Host

Adeptus Custodes · 11 pilots · FAVOURABLE — out-OC + grind

How to play: Elite-but-FEW (W3-4, ~40 models). Out-OC (your OC10 vs their OC2) and grind their bodies with anti-infantry VOLUME (Avenger/RFBC/plasma). Volcano/thermal the Caladius + characters, NOT W3 Custodians (overkill). Lancer SWEEP (A10 S10) chews squads; target-rich for decapitation. Don't get greedy into their melee.

Rest of the field — how-to-play

Librarius Conclave **COIN-FLIP → hard**

Dark Angels · 5 pilots · sim FAVOURED

As the SM Conclave — Dev-Wound plasma/Sternguard + psychic buffs that bypass invuln. Kill the buff/psychic engine first; spread vs Dev-wound smite; deny the alpha.

Skysplinter Assault **FAVOURABLE**

Drukhari · 5 pilots · sim FAVOURED

Their Lethal/Decapitating keywords are NON-Vehicle → they don't touch your Knights, and no haywire. Out-durable and win the attrition. Only risk = losing Reconnaissance TEMPO — don't let them free-score; contest the board, kill the raiders (W-fragile).

Liberator Assault Group **HARD**

Blood Angels · 5 pilots · sim FAVOURED

BA hammers/fists smash your no-invuln fight phase (the sim's worst matchup the other way). SHOOT THEM OFF BEFORE THE CHARGE, Lancer 4++ is your only melee answer, screen + kite the Death Company / Sanguinary hammer. Never let a

gun-Knight get charged; win at range or not at all.

Virulent Vectorium **COIN-FLIP**

Death Guard · 5 pilots · sim EVEN

Mortarion + Plague Marines, 5+++ and -1 Dmg army-wide. Don't grind into the FNP wall — out-tempo, remove what you can at range, play the mission. Mortarion is a Lancer target (T12 monster) but tanky; only commit for a clean kill.

Equatorial Hordes **HARD**

Orks · 5 pilots · sim FAVOURED

The horde pole — 100+ bodies you can't out-OC. Anti-infantry VOLUME into the blobs (Avenger/RFBC), kill what's ON the objectives, don't chase. Accept the OC loss, win secondaries where possible. Green-Tide-adjacent = known bad matchup.

Lions of the Emperor **FAVOURABLE**

Adeptus Custodes · 5 pilots · sim FAVOURED

Same as Shield Host: so-few-models, out-OC and grind them off with volume. Watch Martial Ka'tah stances in melee — stay at range, refuse the gang. Lancer sweeps their squads; Volcano the Caladius/characters, not W3 bodies.

Grand Coven **COIN-FLIP**

Thousand Sons · 5 pilots · sim ATTRITION-NEGATIVE

Rubric marines (2+, All Is Dust -1 Dmg) + Magnus + psychic Dev-Wounds that BYPASS invuln. Magnus = a Lancer decapitation target (big monster, but warded — commit only for the kill). Kill the psychic buff/caster engine, spread vs Dev-wound smite, grind the Rubrics with high-Dmg guns (their -1 Dmg blunts multi-dmg).

Peerless Bladesmen **COIN-FLIP**

Emperor's Children · 4 pilots · sim FAVOURED

Slaaneshi elite-melee (Lucius/Lord Exultant + Flawless Blades/Infractors). Same plan: shoot the killable multipliers, refuse the melee trade you don't want, Lancer counters, win on OC/secondaries. Fast — screen your backfield.

Khorne Daemonkin **HARD**

World Eaters · 4 pilots · sim FAVOURED

Angron + Berzerkers + Eightbound melee blender. SHOOT ON THE WAY IN, Lancer 4++ counter, screen + kite — never get charged in bulk. Angron is a Lancer target but returns; don't over-invest, just deny the charge and out-shoot.

Legion of Excess **COIN-FLIP**

Chaos Daemons · 4 pilots · sim FAVOURED

Keeper of Secrets + Fiends + Daemonettes — fast, fights-first melee. Screen the charge lanes, shoot the Keepers (big monster, but 4++ — commit guns not a wasted Lancer), out-durable the fragile Daemonettes. Don't get caught mid-board; Lancer counters a lead daemon.

Freeblade Company **COIN-FLIP**

Imperial Knights · 4 pilots · sim EVEN

Mirror with more Armigers. Volume-kill their Armigers, Lancer hunts their big knights (Castellan/Destrier/Paladin), Rotate the focused Knight, first turn decides it. Out-activate carefully — more small knights = more of their activations.

Mont'ka **UNFAVOURABLE → directional**

T'au Empire · 4 pilots · sim HARD

Mont'ka = forward/alpha T'au (extra move+shoot on the key turn). Weather the aggressive turn from cover, then punish the exposed suits with your guns. Kill fusion/rail first. Directional — verify.

Carnival of Excess **COIN-FLIP → directional**

Emperor's Children · 4 pilots · sim FAVOURED

Slaaneshi horde-lean (more bodies, Take-and-Hold). Anti-infantry volume into the blades, out-durable, hold objectives on OC10. Directional — verify the exact build.

Cabal of Chaos **COIN-FLIP**

Chaos Space Marines · 4 pilots · sim FAVOURED

Abaddon/Huron + Chosen/Terminators + Defiler. WATCH DARK PACTS — they buy Lethal/Dev on demand (invuln-negation). Defiler = Volcano target; Chosen/Terminators die to AP volume; Abaddon/Huron are tough (Lancer only for a clean kill). Kill the buff characters, screen the alpha.

Berzerker Warband **HARD**

World Eaters · 4 pilots · sim FAVOURED

Berzerker-heavy charge army. Same plan: kill on the approach, screen the charge lanes, Lancer counters the lead brick, kite the rest. Win at range or lose the fight phase.

Dread Mob **COIN-FLIP**

Orks · 4 pilots · sim FAVOURED

Walker/dakka (Kill Rig, Deffkoptas, big meks, rokkits). Their rokkits pop your Armigers — keep them back. Trade guns, kill the anti-tank platforms, out-durable the shooting; fewer bodies than a horde so OC is winnable.

Chaos Cult **COIN-FLIP → horde-lean**

Chaos Space Marines · 4 pilots · sim FAVOURED

Cultist bodies + Defilers + bikers. Anti-infantry VOLUME into the cultists, Volcano the Defilers, out-durable; don't get out-OC'd by the chaff — kill what's on the points. Watch Dark Pacts on the Legionaries/Chosen.

Rubricae Phalanx **COIN-FLIP**

Thousand Sons · 4 pilots · sim ATTRITION-NEGATIVE

Rubric-heavy (2+/-1 Dmg bodies) + sorcerers. Same as Grand Coven: kill the casters/buff engine, use high-Dmg guns into the -1-Dmg Rubrics, spread vs Dev-wound smite. Out-OC where you can — Rubrics are low model-count.

Possessed Slaughterband **HARD → directional**

World Eaters · 3 pilots · sim FAVOURED

Possessed/daemon-engine melee. Shoot before the charge, Lancer 4+ +, screen. Directional — verify the engines (Lord of Skulls / daemon engines are Volcano targets).

More Dakka! **COIN-FLIP**

Orks · 3 pilots · sim FAVOURED

Tankbustas + Flash Gitz + Shokk Attack + Boyz. Their rokkit/Tankbustas threaten your Armigers + Questoris — KILL THE TANKBUSTAS/FLASH GITZ first (their anti-tank), out-durable the dakka. Fewer bodies than a horde so OC is winnable; keep Armigers out of rokkit range.

War Horde **HARD**

Orks · 3 pilots · sim FAVOURED

Boyz-forward horde. Same as Equatorial: out-bodied, can't out-OC. Volume into the blobs, hold what you can, bank secondaries, accept the primary deficit.

Champions of Contagion **COIN-FLIP**

Death Guard · 3 pilots · sim EVEN

Poxwalkers + Blight-haulers + Deathshroud + Lord of Contagion, 5+++ / -1 Dmg. Don't grind into the FNP; kill the Myphitic Blight-haulers (their anti-tank) at range, out-tempo, play the mission. Deathshroud are a nasty counter-charge — don't feed a gun-Knight.

Shadowmark Talon **COIN-FLIP → directional**

Space Marines (Astartes) · 3 pilots · sim FAVOURED

Raven Guard infiltrate/stealth + jump-pack alpha (Shrike, Aethon Shaan, Incursors/Infiltrators). SCREEN your deployment to deny infiltrate/scout charges >9", weather the jump alpha, out-shoot. Watch a marked-target buff. Directional — verify at the table.

Brandfast Oathband **COIN-FLIP**

Leagues of Votann · 3 pilots · sim ATTRITION-NEGATIVE

Land Fortress + Sagitaur + Hearthkyn + Thunderkyn. Judgement tokens = re-roll wound + AP vs a marked unit (invuln-negation risk). Kill the Land Fortress + Thunderkyn (anti-tank), deny the judgement stack on a key Knight, out-durable; fewer bodies than Needgaa'd so OC is winnable.

Grizzled Company **UNFAVOURABLE**

Astra Militarum · 3 pilots · sim FAVOURED

Orders + Bullgryn wall + tanks/artillery/lascannon volume that chunks Questoris. Kill the tanks/artillery/Hellhound early, weather the volume from cover, grind the infantry — but they out-body you on OC. Bank secondaries; don't over-expose a Knight to massed lascannon.

Aspect Host **UNFAVOURABLE → directional**

Aeldari · 3 pilots · sim EVEN

Fire Dragons (MELTA — delete a Knight) + Warp Spiders + Banshees + Avatar + Falcon. KILL THE FIRE DRAGONS before they reach melta range (screen the Falcon delivery), evasion neuters your melee, they out-tempo. Avatar = a Lancer target. Expect a tempo loss; win where the guns can catch them.

Explorator Maniple **UNFAVOURABLE**

Adeptus Mechanicus · 3 pilots · sim ATTRITION-NEGATIVE

Kataphron Anti-Vehicle-4+ + Lethal bricks ≈ a dead Knight/turn, and they out-body you. Kill the Kataphron bricks first (they're the anti-tank), deny the alpha, don't get out-scored — bank secondaries, respect the loss.

Biosanctic Broodsurge **COIN-FLIP**

Genestealer Cult · 3 pilots · sim HARD

Purestrains + Abominant + Ridgerunners + Neophyte/Acolyte horde, cult ambush. DENY the ambush (screen every drop >9"), anti-infantry volume into the bodies, Lancer counters the Purestrains. Watch the return/re-deploy; kill what scores, don't chase.

Forgefather's Seekers **COIN-FLIP**

Space Marines (Astartes) · 3 pilots · sim HARD

Salamander flamer/melta durable + ERADICATORS + Storm Speeder Hammerstrike + Vulkan. Kill the Eradicators (melta anti-tank) + Storm Speeder (anti-tank/buff) first, out-durable the flamers, trade guns. Vulkan buffs their melta — priority to remove the melta package.

Saga of the Beastslayer **HARD**

Space Wolves · 3 pilots · sim FAVOURED

Wolf Guard Terminators + Arjac/Bjorn/Logan delivered by a Land Raider Redeemer. SHOOT THE LAND RAIDER before it disgorges (Volcano), Lancer counters the lead brick, screen + kite. Their characters hit like trucks in melee — never get a gun-Knight charged.

Flyblown Host **COIN-FLIP**

Death Guard · 3 pilots · sim HARD

Blight-haulers + Plague Marines + Deathshroud + Bloat-Drones, 5+++/1 Dmg. Kill the Blight-haulers/Bloat-Drones (anti-tank) at range, don't grind into the FNP, out-tempo + play the mission. Deathshroud counter-charge — screen your gun-Knights.

Lords of Dread **COIN-FLIP**

Chaos Knights · 3 pilots · sim FAVOURED

Big-model mirror-ish — War Dogs + Abhorrent/Tyrant. It's a Knight duel: Lancer hunts their big knights/war dogs, Rotate discipline vs their guns, first turn matters. Trade Volcano into their Questoris; watch dread abilities (fear/MW).

Pantheon of Woe **HARD / play-the-mission**

Necrons · 2 pilots · sim FAVOURED

Nightbringer + Void Dragon C'tan (un-killable: 4++ , -1 Dmg, necrodermis return) + Tomb Blades/Scarabs. Can't table the C'tan — kill the no-invuln soft OC (Tomb Blades/Scarabs), out-tempo on secondaries, play the mission. Never dump guns into a C'tan.

Infernal Lance **COIN-FLIP**

Chaos Knights · 2 pilots · sim EVEN

War-Dog swarm lean. More small knights = out-activation risk; Lancer + Volcano pick off war dogs, Rotate the focused Knight, hold OC10 objectives. Knight duel — first turn + target priority decide it.

Reclamation Force **COIN-FLIP**

Space Marines (Astartes) · 2 pilots · sim FAVOURED

Ballistus Dread + Bladeguard + ERADICATORS (melta — they delete a Knight) + Captain Titus. Eradicators are the #1 priority kill (no invuln, your Volcano/volume removes them), then the Ballistus. Out-durable the rest, trade guns; don't cluster a Knight in melta range.

Court of the Phoenician **COIN-FLIP**

Emperor's Children · 2 pilots · sim FAVOURED

Fulgrim + Infractors/Flawless Blades/Noise Marines. Screen/concede Fulgrim, shoot the killable support, win Priority Assets on OC10, Lancer 4++ counters the chaff melee. Fast — protect your backfield.

Bridgehead Strike **COIN-FLIP → directional**

Astra Militarum · 2 pilots · sim FAVOURED

Tempestus Scions/Aquilons + Krieg deep-strike with melta/plasma. DENY THE DROPS (screen >9", Gaze bubble), weather the alpha, then shred the droppers — they're T3 W1, volume deletes them once landed. Punish as they expose.

Saga of the Great Wolf **HARD**

Space Wolves · 2 pilots · sim FAVOURED

Wolf Guard Terminators + Aggressors + Arjac/Bjorn/Logan. As Beastslayer — shoot the delivery/lead brick before the charge, Lancer counter, screen + kite. Logan/Arjac wreck a gun-Knight in melee; win at range.

Stormlance Task Force **HARD**

Blood Angels · 2 pilots · sim FAVOURED

Sanguinary Guard + Death Company (jump packs) + Dante + Gladiator Lancer. BA jump-hammer smashes your fight phase — SHOOT THEM OFF before the charge, Lancer 4++ counters the lead brick, screen + kite; kill the Gladiator Lancer (anti-tank). Never let a gun-Knight get charged.

Gate Warden Lance **COIN-FLIP**

Imperial Knights · 2 pilots · sim EVEN

Armigers + Canis Rex + big knights, defensive lance. Knight duel — Lancer hunts their big knights, volume-kills Armigers, Rotate the focused Knight. Canis Rex is a tough character-knight (Sir Hekhtur pilot ejects) — don't over-commit the Lancer into it.

Scintillating Legion **COIN-FLIP**

Chaos Daemons · 2 pilots · sim HARD

Lord of Change + Be'lakor + Horrors + Screemers. Dev-wound smite BYPASSES your invuln — KILL THE CASTERS (Lord of Change/Be'lakor are ward 4++ , commit guns for a clean kill), spread vs smite, anti-infantry into the Horrors. Watch Be'lakor's shadow debuffs.

Brotherhood Strike **COIN-FLIP → directional**

Grey Knights · 2 pilots · sim FAVOURED

Paladin/Terminator bricks (2+/4++/multi-W) + Dreadknight + psychic Dev-wounds + teleport. Deny the drops (>9"), out-

Crusher Stampede **COIN-FLIP**

Tyrannids · 2 pilots · sim FAVOURED

Norn Emissary/Assimilator + Tyrannofex + Hive Tyrant + Broodlord. Kill-race, not OC. Volcano the NO-INVULN Norn Emissary + Tyrannofex at range, Lancer-assassinate a Norn (~21/charge), refuse the melee gang (kite), grind the 4++ Assimilators. Win on kills + anchors removed.

Bringers of Flame **COIN-FLIP**

Adepta Sororitas · 2 pilots · sim FAVOURED

Watch Miracle Dice on a key save/wound. Out-durable once the melta's gone.

Synaptic Nexus **COIN-FLIP**

Tyrannids · 2 pilots · sim FAVOURED

Obeisance Phalanx **HARD / play-the-mission**

Necrons · 2 pilots · sim FAVOURED

3× Monolith (T13 W22 2+, melta wounds on 5s) + Silent King + Imotekh. The Monoliths are near-un-killable AND deep-strike anchors — do NOT over-invest guns cracking them; kill the softer scoring pieces, out-manoeuve (they're slow), play Disruption-style tempo. A removal/mission game, not attrition.
