

LSO RUNBOOK — IMPERIAL KNIGHTS

*List Decision + Per-Archetype Battle Plans
Lone Star Open (LSO) — 300+ players, Swiss
Generated 2026-07-26 (11E, post-Dataslate)*

Version 1.3 · 2026-07-27

THE DECISION — which list to take

LIST A — 2 Castellan / 1 Lancer / 1 Crusader (SHOOTING-DOMINANT)

Two Volcano lances win the shooting phase outright; ONE Lancer is the single counter-charge/decapitation blade. Firepower-as-denial: delete their anti-Knight and soft OC at range before it connects. Both Castellans carry DOMINUS (so Dominus Foebreakers buffs TWO Knights). Pilot's strong, comfortable game plan.

- **2x Knight Castellan (425 + 450)** — The shooting core (escalating: 1st 425, 2nd 450). 2x Volcano (D3 shots ea, ~23 dmg) one-shots no-invuln anchors + snipes; plasma decimator anti-elite; +1 hit vs terrain (Dominus). #1 bears Archeotech Autoloaders (re-roll the shot count on the D3/D6+3 guns).
- **1x Knight Crusader (410)** — 395 base + 15 for the RFBC. Anti-infantry SUBTRACTION: RFBC + Avenger A18 strip soft OC; thermal for anti-tank/Speeders.
- **1x Cerastus Knight Lancer (415)** — The one blade: 4++ FULL invuln vs ALL, M14 W28. Counter-charge + kill characters (standalone monsters/Titanic DIRECTLY; ATTACHED buff-characters via EPIC CHALLENGE — 1CP core strat granting its melee [PRECISION]) + Shock-Charge free Tank Shock.
- **1x Armiger Helverin (140)** — Backfield 48" autocannon platform — BOND TO THE CRUSADER (Crusader's Duty Bondsman = +1 to hit -> BS2+, 8 shots): consistent anti-infantry/light removal that fills the list's anti-scorer gap. Survivable OC6 home/backfield anchor (you're out-OC'd by most of the field) + Suppression Protocols (-1 to hit its target). Chosen over a Warglaive: the list's anti-tank is already over-solved (2x Volcano + thermal + shieldbreaker + Lancer), so add ranged volume + a body that survives to score, not a fragile forward melee piece that duplicates the Lancer.
- **1x Navigator (Agents ally) (75)** — 12" anti-Deep-Strike dome (vs BA/SW/GSC/deep-strike alphas) + Hidden home-holder. Allies take no enhancement. (75 confirmed from Scott Ketcham's Tacoma roster.)

LIST B — 1 Castellan / 2 Lancer / 1 Crusader (COUNTER-PUNCH)

Two 4++ full-invuln Lancers turn the no-melee-invuln fight phase — the universal Knight weakness — into a strength: two counter-charge blades + two assassins

cover TWO melee lanes and are near-unkillable in combat. Price: HALF the long-range firepower (one Volcano, not two) — you lose the ranged-anti-tank duels the shooting meta forces.

- **1x Knight Castellan (~435)** — The one long-gun anchor: Volcano one-shots a no-invuln target/turn + plasma anti-elite.
- **2x Cerastus Knight Lancer (~415 ea)** — TWO 4++ full-invuln M14 blades — two counter-charge monsters + two character-assassins + two free Crushing-Impact charges. Cover two melee lanes.
- **1x Knight Crusader (~435)** — Anti-infantry SUBTRACTION + thermal anti-tank — the shooting the single Castellan can't cover alone.
- **1x Armiger Helverin (140)** — Backfield 48" autocannons + cheap OC6 screen.
- **1x Navigator (Agents ally) (~75)** — 12" anti-Deep-Strike dome + Hidden home-holder (same load-bearing role in both lists).

The trade (verified 11E sim)

- **Extra Knight Castellan (List A gains) [RANGED]:** VERIFIED profiles: Volcano lance 72" D3 shots S18 AP-5 D6+8 [Blast] = avg ~2 shots x ~11.5 = ~23 dmg into one target (one-shots a Hammerhead/Land Raider/Shadowsword/Kataphron brick/Ironstrider/Defiler and splits over) + plasma decimator 48" D6+3 shots S9 AP-4 D3 supercharge (~6.5 shots — shreds Terminators/elites, AP-4) + shieldbreaker S12 AP-6 D6+1 [Anti-Titanic 4+, Dev] — a TITANIC sniper (enemy Knights/superheavies), not an infantry-character sniper. NET: ERASES ~1-2 extra priority targets PER TURN at range (bigger than first modelled — Volcano is D3, not 1). Wins the SHOOTING matchups.
- **Extra Cerastus Lancer (List B gains) [MELEE + DURABILITY]:** VERIFIED: on the charge, shock-lance STRIKE 5A WS2+ S20 AP-3 D8 [Lance] = ~4.2 hits, wounds <=T12 on 2s, ~3.7 wounds x D8 (~4.5) minus saves ~ deletes any single non-Titanic target (Defiler, Bloodthirster, Magnus-wound-down, a Custodian character, a Terminator brick's core) + Shock Charge free Tank Shock (bonus MW). SWEEP 10A S10 AP-2 D3 = ~5-7 MEQ/turn into hordes. PLUS a 4+-vs-ALL, W28, M14 body that survives the melee that kills a bare-3+ Castellan. NET: neutralises ~1 extra MELEE lane/turn + a 2nd assassin + a near-unkillable counter-puncher. Wins the FIGHT matchups.
- **The trade, in one line [DECISION]:** List A removes ~1-2 more things per turn AT RANGE (dominates the shooting phase); List B survives + counter-punches one more MELEE lane (wins the fight phase you can't tank). Which matters more = which half of the meta you expect to face, and which losses hurt most. Points are near-identical (~1825-1840 base each; Castellan escalates 425/450, Crusader 410 w/RFBC — confirm Lancer/Armiger vs MFM).

Prevalence-weighted tally (n=75 top-finishing lists)

Clear edge to LIST A (2 Castellan — win the shooting matchups): AdMech (6), T'au Retaliation (5), Drukhari (3), Votann (3), Astra Militarum (2), Salamanders (~3), Necrons Cursed-Legion (~2), DA Ravenwing (1), Imperial Fists (target)

Clear edge to LIST B (2 Lancer — win the fight matchups): Custodes (4), Blood Angels (4), DA Deathwing (~3), Thousand Sons (3), Chaos Daemons Khorne (~2), Iron Hands Terminators (~2), Orks (8, but a loss either way)

EVEN (either list performs similarly): Emperor's Children (9), CSM (3), Tyranids (3), Necrons C'tan (~2), SM mixed, Chaos Knights (1)

Recommendation & reasoning

IT'S CLOSE — and that's the honest headline. Prevalence-weighted, the field splits almost evenly: ~24 of 70 lean LIST A (the ranged-anti-tank half), ~17 lean LIST B plus the 8 un-winnable Orks, and ~19 are EVEN (led by the #1-tie Emperor's Children). The meta is ~57% melee-forward BY BODY, which argues for the 2nd Lancer — BUT the matchups that leans decide are asymmetric.

RECOMMENDATION: LIST A (2 Castellan / 1 Lancer), narrowly, for three data-grounded reasons:

- 1) WORST-CASE MITIGATION. The A-favoured matchups (T'au, AdMech, Astra Militarum, Votann = ~16 prevalence of pure ranged anti-tank) are the ones that TABLE a Knight army 0-VP. You LOSE games there. List B surrenders those ranged duels (one Volcano, not two) for a fight-phase edge in matchups you can often still finesse on the MISSION.
- 2) THE MELEE MAJORITY IS BEATABLE WITHOUT THE 2ND BLADE. The biggest melee chunks are hordes/chaff (EC Daemonettes, Ork Boyz) that SHOOTING thins as well as a Lancer would, and the ELITE melee (Custodes/BA/DA) you beat by OUT-OC-ing on the primary + screening the alpha (Navigator dome) + 1 Lancer counter-charging the key lane — not by trying to win the fight phase outright.
- 3) PILOT FIT. 'Dominate the shooting phase' is a cleaner, more repeatable plan over a 6-round grind, and List A is the build you've practised.

TAKE LIST B INSTEAD IF: you read your local LSO field as melee-dominant (lots of Custodes/BA/DA/Daemons/World Eaters), you're more comfortable in the counter-punch game, or you value the near-unkillable 2nd 4++ body as insurance against the melee alpha. List B's edge is REAL vs the elite-melee cluster — it just pays for it by losing the ranged wars that produce your ugliest losses.

EITHER WAY: fix the list to a costed 2000 (add the 3 enhancements), lock PURGE THE FOE, and the Navigator dome is load-bearing in both. The gap between the two lists is small — pilot comfort is a legitimate tiebreaker.

THE META — what's winning (n=75)

n=70 top-finishing lists dated ON/AFTER 2026-07-23 (post-Dataslate cutoff: the 7/22 Dataslate reset points/rules, so pre-7/23 GTs incl. Tacoma 7/17 + Edinburgh 7/18 are EXCLUDED). WINNERS' meta, late July 2026 — the exact filth LSO's top tables will bring. Counts are of top lists, not raw popularity, so read them as 'what's winning', prevalence-weighted. POST-SAMPLE ADD (2026-07-25): a Space Wolves Saga of the Beastslayer went 5-0 at Bedburger Scheunen Kloppen — folded into the Space Wolves read below (not re-weighted into the n=70 counts).

Faction / archetype	# top	Character	Favours
Emperor's Children (Frenzied Host / Coterie / Court)	9	MELEE swarm + 1-2 Defilers (anti-tank shooting)	EVEN
Orks (Green Tide / Dread Mob / Beast Snagga)	8	MELEE horde + OC-flood (some Stompa/Dakka)	B (weak)
Adeptus Mechanicus (Lords of the Forge / Rad-Zone / Eradication)	6	SHOOTING anti-tank + rad debuff	A
Space Marines (Salamanders melta / Iron Hands Terminators / Ultra)	6	MIXED (melta+lascannon / hammer brick)	EVEN
T'au Empire (Retaliation Cadre)	5	SHOOTING — deep-strike fusion/rail alpha	A
Necrons (Awakened C'tan / Cursed Legion Lokhust)	4	MIXED — gauss shooting / C'tan+Wraith melee	A (slight)
Dark Angels (Deathwing bricks / Ravenwing)	3	MELEE 4++ bricks (3) + speed (1)	B
Adeptus Custodes (Lions of the Emperor / Shield Host)	4	MELEE elite 2+/4++	B
Blood Angels (Stormlance / Rage-cursed / Angelic)	4	MELEE jump alpha	B
Drukhari (Skysplinter Assault)	3	MELEE fast + dark-lance chip	A
Leagues of	2	SHOOTING	A

Votann (Hearthguard Covenant)		plasma bricks + rail + Beserk drop	
Chaos Space Marines (Renegade Raiders / Cabal Defiler)	3	MIXED — mobile raid / Defiler-spam	EVEN
Thousand Sons (Grand Coven / Rubricae Phalanx)	3	Magnus melee monster + durable Rubrics	B (slight)
Tyranids (Crusher Stampede)	2	MELEE monsters + gun-bugs	EVEN
Chaos Daemons (Khorne Bloodcrusher cav / Nurgle grind)	3	MELEE fast cavalry / durable grind	B
Astra Militarum (Steel Hammer superheavy / Grizzled artillery)	2	SHOOTING high-S anti-tank	A
Long tail (Aeldari Windrider, Death Guard, Chaos Knights)	3	one each — mixed	EVEN

RULES CHEAT-SHEET

- **Ion Shield** — 5++ invuln vs SHOOTING ONLY (ranged). Does NOTHING in melee.
- **Rotate Ion Shields** — VALOURSTRIKE 1CP STRATAGEM: +1 to a Knight's invulnerable save vs SHOOTING (5++ -> 4++) for the phase. The core durability lever in the hard shooting matchups — cycle it onto the focused Knight each turn. (Stratagems ARE the detachment: how Valourstrike actually plays.)
- **Questoris/Dominus melee** — NO melee invuln (verified — printed 5+* is 'vs ranged attacks only') — bare 3+ armour in the fight phase. Melee is the universal Knight weakness (only the Sanctuary enhancement adds a melee 5++).
- **Cerastus Lancer** — VERIFIED 415pts, M14 T11 W28, 4++ invuln vs ALL attacks (no asterisk). Shock lance STRIKE 5A WS2+ S20 AP-3 D8 [Lance] (wounds anything <=T12 on 2s) / SWEEP 10A S10 AP-2 D3. Shock Charge = free Tank Shock (0CP) on the charge. Character-assassin: standalone monster/Titanic characters DIRECTLY; ATTACHED characters via EPIC CHALLENGE (1CP core strat -> [PRECISION] in melee). No Knight GUN has Precision -> you canNOT snipe attached characters at range.
- **Volcano lance** — VERIFIED 72" D3 SHOTS (avg 2), S18 AP-5 D6+8 [Blast] — ~23 dmg/turn; one-shots no-invuln anchors (Hammerheads T10, Land Raiders

T12, Kataphrons, Shadowsword, no-invuln Norns/Emissaries). Overkill into low-W chaff. The Castellan is 425/450 pts (escalating: 1st 425, 2nd 450 — MFM).

- **Bold Gallantry (Valourstrike)** — Any Knight Advances -> ALL Knight ranged weapons gain [ASSAULT] army-wide that turn (advance-and-shoot).
- **Rain of Devastation (Dominus)** — Dominus Knights' attacks vs a unit in a terrain area get +1 to hit.
- **Super-Heavy Walker** — Movement-only. NO Knight falls back and shoots — an engaged Knight instead shoots OUT of combat at -1 to hit (tar-pit costs -1).
- **What beats Knights** — (1) invuln-NEGATION: Anti-Vehicle/Monster X+ (wound regardless of S) + Devastating Wounds (crit->mortal); (2) massed AP-2+ VOLUME (5++ fails 68%); (3) MELEE into the no-invuln fight phase; (4) out-OC / out-score.
- **Helverin Bondsman (EVERY TURN)** — Keep the Armiger Helverin within Bondsman range of the KNIGHT CRUSADER -> Crusader's Duty = +1 to hit = BS2+ on its 8 autocannon shots (48"). It is your SAFE backfield/home OC6 anchor + Suppression (-1 to hit its target) -- do NOT push it forward, and don't let it drift out of the Crusader's bond.
- **Killing characters (NO Precision on any Knight)** — You CANNOT target a Character attached to a Bodyguard unit — every wound goes to the bodyguard (no Knight GUN has [PRECISION], so you canNOT snipe at range). Tools: (1) EPIC CHALLENGE (core strat 15.03, 1CP): in the FIGHT phase a Knight CHARACTER's melee weapons gain [PRECISION] -> the Lancer (5x S20 AP-3 D8) charges the unit and deletes the attached character. (2) STANDALONE Monster/Vehicle/Titanic characters (Fulgrim, Magnus, Lion, Daemon Princes, Steel-Hammer superheavies, enemy Knights) = shoot/fight DIRECTLY, no strat. (3) Clear a SMALL bodyguard whole to expose the character. (4) Lone Operatives = only targetable within 12".
- **CP economy (verify against list-building)** — ~2 CP/round (1 at the start of EACH player-turn), ~10/game; + rare discard-a-secondary (max +1/turn) + CP-granting models. Each Strat is once/phase and costs CP. Rotate Ion Shields (1CP) and Epic Challenge (1CP) COMPETE each turn — plan the spend. HONOURED (Code Chivalric Deed completed) = +2 CP (3 if you rolled the Oath), exempt from the per-round cap -> a real CP engine; completing a Deed EARLY funds Rotate + Epic Challenge all game.
- **Code Chivalric (the Oath — pick per matchup)** — 1 Deed + 1 Quality at deploy. QUALITY (army-wide, all game): MARTIAL VALOUR (re-roll 1 hit + 1 wound shoot/fight = the shooting amplifier, DEFAULT) / LEGACY (+2 OC, +1 Ld = the out-OC fix vs hordes) / EAGER (+2" M, +1 Adv & Charge = land the Lancer + out-manoeuve). DEED (complete once -> Honoured +2/3CP): REAP A TALLY (destroy > round-number units this round — fast for a gun list) / LAY LOW THE TYRANT (kill a named enemy CHARACTER — only vs a STANDALONE/Titanic linchpin you can actually kill, or an attached one the Lancer can Epic-Challenge) / RECLAIM THE REALM (out-OC them — AVOID, you're usually out-OC'd). See CODE_CHIVALRIC for the per-archetype picks.
- **Battle-shock — the wounded-Knight trap** — Core 01.07 + the rulebook's own VEHICLE example: a single-model unit BELOW HALF its Wounds must take a battle-shock roll (Ld) every Command phase. A damaged Castellan (<12 of 24W), Crusader (<11 of 22), Lancer (<14 of 28) or Helverin (<6 of 12) therefore rolls

each turn, and on a FAIL it (a) has OC '-' (0) so it stops holding objectives, (b) CANNOT be targeted by stratagems -> you canNOT Rotate Ion Shields it the very turn it's hurt and most needs the 4++, and (c) can't do Actions. So a hurt Knight can be locked out of its own durability lever. Mitigate: LEGACY UNSULLIED Quality (+1 Ld eases the roll) and INSANE BRAVERY (core 15.04, 1CP: auto-pass ONE test — save it for the Knight you MUST Rotate next turn). WEAPONIZED at LSO by Tyranids (Shadow in the Warp forces ALL your units to test, on 3D6 near synapse), Necrons (1CP C'tan strat, forced test at -1 + D3+1 mortals), CSM and Chaos Daemons (Fear/forced tests). Vs those decks, keep a Knight either above half or above-half-and-screened, and bank a CP for Insane Bravery.

Code Chivalric — the Oath (pick 1 Deed + 1 Quality per game)

Deeds (complete once → Honoured +2/3 CP):

- **Reap a Great Tally** — End of round: units you destroyed THIS round > the round number (R1 need 2, R2 need 3...). Fastest for a gun list — completes R1-2 vs target-rich armies -> early Honoured +CP.
- **Lay Low the Tyrant** — Name an enemy CHARACTER at deploy; done when it dies. Only pick vs a linchpin you can ACTUALLY kill: a STANDALONE monster/Titanic (Fulgrim/Magnus/Lion/superheavy/enemy Knight), or an ATTACHED one the Lancer can reach + Epic-Challenge (1CP).
- **Reclaim the Realm** — End of THEIR turn: you control more objectives than them. AVOID for List A — you're out-OC'd by most of the field.

Qualities (army-wide, all game):

- **Martial Valour** — Re-roll 1 hit + 1 wound each time a Knight shoots or fights. DEFAULT — amplifies the shooting win-con army-wide.
- **Legacy Unsullied** — +2 OC, +1 Ld (Castellan OC12, Helverin OC8). Swap in vs the OC-race/horde matchups.
- **Eager for the Challenge** — +2" Move, +1 Advance & Charge. Out-manoeuver fast/flip armies + GUARANTEE the Lancer's decisive charge.

Realistic record

Realistic 300+ GT expectation (re-verified): a positive-but-underdog record, roughly 3-3 to 4-2 over 5-6 rounds (~55-65% game win rate, pairing-skewed). Bank the broad early/mid field (the favourable + winnable coin-flips); slide toward losses as the top cut concentrates the filth (Necrons/T'au/Ravenwing/AdMech/SW). Correct Knight goal: strong positive + steal a couple you shouldn't win — NOT winning the event. The 2-Castellan shooting core IMPROVES this over 2-Lancer (more removal-race firepower for exactly the hard matchups). List blind spots (priority order): (1) [RESOLVED] costed to 1,970/2000 (1 Armiger + Archeotech Autoloaders + Blessed Plate); (2) only ONE 4++ Lancer into a melee-heavy field — accepted price of shooting-dominance; mitigate by killing deliverers pre-charge, NOT a 2nd blade; (3) screening deep-strike alphas (BA/SW/Votann/GSC) with only ~5 combat models — the Navigator dome is load-bearing; (4) anti-horde is moderate (accept Green Tide);

(5) out-OC'd by most of the field -> lock PURGE THE FOE (kill-weighted) over Priority Assets.

Mindset

Knights are 'always outnumbered, rarely outgunned.' At a 300+ GT, START every hard matchup from the EXPECTATION OF A LOSS and hunt the HEIST. Model the opponent playing OPTIMALLY. Realistic goal: a strong POSITIVE record + steal a couple you shouldn't win — not winning the event. The 2 Volcano lances win the shooting phase; the Lancer wins the melee phase you can't tank; you win the game on the mission (out-OC where you can).

MATCHUP INDEX

Archetype	Verdict	Better list	Deciding factor
Necrons — Cursed Legion (18 Lokhust Destroyer gauss-spam)	UNFAVOURABLE	A	54 gauss cannons S7 AP-2 D2 Lethal (~kills a Knight/turn through Rotate) + un-killable Void Dragon (4+ +/-1Dmg/reanim) + reanimation refunds chip + out-OC.
Necrons — Awakened Dynasty (triple-C'tan spam)	COIN-FLIP (lean unfavourable)	EVEN	3 un-killable C'tan (4+ +/-1Dmg/Reanim). Nominally I out-hold OC4 with OC10 — BUT they're M10 FLY and reanimate, so 'out-OC' is shakier than it looks; win on POINTS not tabling, and don't over-trust the OC math.
Necrons — Obeisance / Monolith spam (faded)	COIN-FLIP	A	3x Monolith T13 W22 2+ NO invuln + reanim. Monoliths ARE killable (Volcano wounds T13 on 3+, AP-5 through 2+; shieldbreaker Anti-Titanic 4+). 12 death rays chunk.
Dark Angels — Darkflight/Raven wing bike swarm	UNFAVOURABLE	A	27 supercharged plasma talons (S9 AP-3 D2) + Chaplain 'Catechism of Fire' = Dev-Wound plasma (bypasses ion shield) + ~90 M12 bikes out-OC + fall-back-and-shoot.
Dark Angels — Deathwing Terminator brick	COIN-FLIP	B	3x un-tableable OC1 bricks (W4 2+/4++ -1Dmg + Armour of Contempt) — but I

			OUT-OC with OC10, and the killable scorers (Repulsor W16 no-invuln, Eradicators, Sternguard) die to my guns.
Space Wolves — Librarius Conclave Terminator/Wulfen deathstar	UNFAVOURABLE	B	8 Assault-Terminator thunder hammers (S8 AP-2 D2 DEV) crack the no-melee-invuln Questoris (~12-14/charge); Sternguard Fusillade (Anti-Veh 5+ + Dev) punches the ion shield; out-bodies/out-OCs. (Half its melee is duds: Wulfen S5, Blood Claws S4.) OBSERVED 2026-07-25: a DIFFERENT SW build — Saga of the Beastslayer (Thunderwolf/beast-hunter) — went 5-0 at Bedburger Scheunen Kloppen. Its detachment tally targets enemy CHARACTER/MONSTER/VEHICLE units, so vs a Knight army it is a HUNTER BY DESIGN (every Knight is a VEHICLE) — a distinct, arguably nastier melee threat than this Terminator deathstar; watch for it and treat it as at-least-as-UNFAVOURABLE.
Blood Angels — Liberator Assault	UNFAVOURABLE	B	Red Thirst (+2 S/+1 A on the

Group / Angelic Host jump-melee alpha			charge) -> Death Company S10 fists, Sanguinary Guard S8 AP-3, Dev hammers; ~15-18 into a Questoris from one DC+Lemartes charge (no melee invuln); best-in-game delivery (M12 + Deep Strike + re-roll charge + Angelic-Host re-drop).
Thousand Sons — Grand Coven	FAVOURABLE	B (slight)	Psychic-MW is THROTTLED in 11E (~5/turn via Doombolt, not spam); Rubrics are warpflamer anti-infantry (bounce off Knights); AP-2 volume is only S4. MAGNUS (T11 W16 2+/4++, S16 AP-3 Dev melee, two-rounds a Questoris) is the ONLY Knight-killer.
Grey Knights — Banishers / Argent Assault (PRELIMINARY)	PRELIM	B	PRELIM — not deep-verified. Elite 2+/4++ Terminators/Paladins + psychic Smite MW + best-in-game teleport/deep-strike. Likely coin-flip -> mild-unfav for Knights (MW + melee into no-invuln fight phase), hard for Sisters.
Chaos Space Marines — Renegade Raiders	COIN-FLIP	EVEN	Record built on OBJECTIVES, not killing Knights. Anti-Knight is CONCENTRATED and killable: Vashtorr (Anti-Veh 4+ Dev hammer + +2 S aura to a

			Daemon-Vehicle Defiler) + Lord Discordant (free MW faucet). Dark Pacts = Lethal Hits.
Emperor's Children — Frenzied Host + Court of the Phoenician	EXPECT-A-LOSS (winnable)	EVEN	Elite MELEE. Fulgrim (T11 W16 2+/4++, -1 to hit, Fights First) deletes a Knight/turn AND shrugs your guns (~2 dmg/Volcano shot). Defiler + Flawless Blades (AP-4) butcher. Thrill Seekers = advance-and-charge threat ranges.
Drukhari — Skysplinter Assault + Exhibition of Slaughter	FAVOURABLE	A	Durability mismatch in MY favour: Volcano one-shots their no-invuln Raiders/Ravagers (T8-9); their Incubi/Exhibition Lethal Hits are NON-Vehicle (don't touch Knights); no haywire = thin invuln-bypass. 13 dark lances chip ~1 Knight/turn but can't table me.
Adeptus Custodes — Lions of the Emperor + Might of the Moritoi	FAVOURABLE	B	'So few models' (~40, tanky-per-model 2+/4++ but W2-4). Anti-Knight is THIN (one Caladius ~6/turn; guardian spears S7 wound me on 5+). Might of the Moritoi is Walker-only = dead (no Dreadnoughts). I OUT-OC (OC10 vs OC2) + grind them off.
Leagues of Votann — Delve	COIN-FLIP	A	Judgement Tokens DON'T exist in

Assault Shift + Hearthguard Covenant / Hearthband			11E (army rule = Prioritised Efficiency, +1 Hit near objectives). Their SHOOTING can't crack me (2 Heavy magna-rail cannons). The danger is the deep-striking Cthonian Beserk maul-swarm — mauls have ANTI-VEHICLE 3+ (wound me on 3s) in the no-melee-invuln fight phase.
Tyranids — Talons of the Norn Queen + Assimilation Swarm (5-Norn)	COIN-FLIP	EVEN	5 Norns (T11 W16, M10) with Singular Purpose OC15 ANCHORS (out-hold me), harpoon melee (S12 AP-3 into no-invuln Questoris), and healing. Emissaries have NO invuln (Volcano one-shots); Assimilators are 4++.
T'au Empire — Experimental Prototype Cadre + Kauyon	UNFAVOURABLE	A	The ceiling anti-Knight SHOOTING: railguns (S20 AP-5 D6+6 DEV WOUNDS — crit-mortals bypass the ion shield) + markerlight-boosted AP-3 volume + 6 Farsight fusion + rail rifles (Dev). A markerlit Kauyon alpha = ~30-40 into one Knight (dead, Rotated or not). Fire-and-Fade evasion neuters my melee.
Adeptus Mechanicus — Lords of the	UNFAVOURABLE	A	Kataphron Breachers' Heavy arc rifles = ANTI-

Forge + Rad-Zone Corps			VEHICLE 4+ (wound my T11-12 on 4+ regardless of S) + Lethal Hits + Cawl reroll -> 2 bricks = ~1 dead big Knight/turn, negating both my pillars (T beaten on 4+, 5++ fails 68%). Rad-Zone = chip-MW/battle-shock, NO Toughness reduction. Out-bodied.
Orks — Kult of Speed / More Dakka	UNFAVOURABLE	A	Fast dakka: 18 Deffkopta rokkit + Speshul Ammo ([Anti-Vehicle 4+] wounds T11-12 on 4s regardless of S) + Mobile Dakkastorm (+2 S). ~1 Knight/turn once koptas range in; out-BODIES + out-mobiles on Disruption; my guns are the wrong shape to clear the koptas (Avenger ~2/turn; 18 koptas = 9 turns).
Orks — Green Tide (~100-165 bodies)	AUTO-LOSS	B (weak)	~100-165 bodies (Mob Mentality 5+ + at 10+ models, no Boyz return). 6-9 Knights CANNOT out-body / out-OC / clear it; the guns are the wrong shape. A known HARD COUNTER and a top all-comers list.
Space Marines (Salamanders) — Forgefather's Seekers flamer-brick	FAVOURABLE	A	Their durability is a PAPER TIGER vs Knight guns: Land Raiders T12 W16 2+ NO invuln (Volcano ~one-shots), everything else W2-3.

			Flamers do nothing to T11-13. Anti-Knight spikes to ~15-22 ONLY if I feed a Knight <12" into an Immolation-Protocols Dev flamer dump.
Chaos Knights — Bastions of Tyranny + Houndpack Lance (PRELIMINARY)	PRELIM	EVEN	Mirror — same chassis (S20 shock lances both ways) + Chaos adds Dreadblades / dark rites / War Dog melee packs. User is CONFIDENT ('Chaos Knights are struggling'). Not deep-verified.
T'au Empire — Retaliation Cadre (deep-strike fusion/rail alpha) — TOP-5 OBSERVED	UNFAVOURABLE	A	The DOMINANT T'au build in the sample (5/75). Deep-strike alpha: 4-5 Commanders + Crisis Sunforge (fusion S9 AP-4 D6), Broadside heavy rail (S12+ AP-4 Dev), Twin Lance, 2x Riptide ion accelerator, markerlight support. A markerlit 9" Sunforge/Crisis drop dumps ~25-35 into ONE Knight (fusion D6 + rail Dev bypass the ion shield). Fire-and-Fade neuters melee.
Chaos Daemons — Blood Legion — Bloodcrusher cavalry + Bloodthirster	COIN-FLIP	B	Fast MELEE alpha: 3x Skullmaster + Bloodcrusher Juggernaut cav (T6 W4, charge bonuses) + Bloodthirster (T10 W18 FLY, great axe S16 AP-3 Dev) + Rendmasters. Daemonic 5++

			everywhere; charges into the no-melee-invuln Questoris. (Nurgle variant = Plaguebearer grind, slower, out-hold problem not a kill problem.)
Astra Militarum — Steel Hammer superheavies / Grizzled artillery — OBSERVED	COIN-FLIP	A	A SHOOTING brawl in my lane: Baneblade/Banesword/Stormsword (CHARACTER via Steel Hammer) + lascannon sponsons, or Shadowsword (Volcano cannon S16 AP-4 D6+6 — one-shots a Knight) + 3 artillery + Leman Russ. High-S anti-Knight, but the superheavies are KILLABLE (T12-14 W22-24, no invuln) and SLOW.
Space Marines (Iron Hands) — Hammer of Averni — Assault Terminator hammer brick — OBSERVED	COIN-FLIP	B	10-model Assault Terminator thunder-hammer brick (S8 AP-2 D2, ~12-16 into a no-invuln Questoris on the charge) delivered by deep-strike + Celerity advance-charge, Feirros durability, Ballistus/Repulsor lascannon backfield. The brick is the only real Knight-killer; the rest is chaff/scorers.
Imperial Fists — 'Great Value' — Emperor's Shield + Librarian Conclave (the LSO target)	COIN-FLIP	A	Unsaveable Sternguard Dev (full wound-reroll vs Oath) + sticky OC10 Intercessors + an OC34 Lysander Terminator brick

			(NOT battle-shock-immune, but Knights have no way to force a test) + Armour of Contempt + a ~30-34 Oath-convergence alpha. Sisters 98-31 lesson: durable + sticky + volume.
Imperial Knights — 2 Castellans / 1 Lancer (the shooting MIRROR)	COIN-FLIP (mirror — first-turn dependent)	B	A shooting slugfest that's ~EVEN by definition (it's a mirror): first turn, cover (-1 to hit), and the Ion-Shield-cycling race decide it. THE KEY: shooting into a Knight gets Ion-Shielded (5++, Rotate 4++), but MELEE does NOT — Questoris/Dominus have no melee invuln — so the efficient kill is the LANCER charging a Castellan (S20, no invuln), not out-shooting the 4++. (Sim note: this reads as B-favoured because more Lancers = the better mirror tool; the absolute is a relative indicator, the real mirror is a coin-flip.)
Imperial Knights — 1 Castellan / 2 Lancer (the melee MIRROR)	COIN-FLIP (lean unfav for List A)	B	Their two Cerastus Lancers (M14, 4+ + ALL-around, S20 AP-3 D8) hunt you, and your shooting into a 4+ + Lancer is inefficient. You out-gun them (2 Castellans vs 1), but killing a fast 4++ Lancer at

			range before it charges is slow — and your lone Lancer is outnumbered in the melee trade. This is the matchup List B (2 Lancer) is built for; List A is on the back foot.
--	--	--	--

BATTLE PLANS

Necrons — Cursed Legion (18 Lokhust Destroyer gauss-spam)

UNFAVOURABLE · *Prevalence: High* · *They run: Purge / Recon*

Better list: A — Delete the Lokhust Destroyer gauss units at range (each removed = ~12 anti-Knight dmg gone). More guns = more removal.

Deciding factor: 54 gauss cannons S7 AP-2 D2 Lethal (~kills a Knight/turn through Rotate) + un-killable Void Dragon (4+/-1Dmg/reanim) + reanimation refunds chip + out-OC.

The heist:

- Erase a full 6-model Destroyer unit T1 (Volcano/thermal — T6/no-invuln) — each removed = ~12 anti-Knight dmg off the table.
- Rotate the focused Knight every turn; body-block so a 2nd Knight is never offered.
- Do NOT chase the Void Dragon (tar pit that heals off your hulls) — screen it away from melee; Lancer duels/pins it.
- Win on tempo/objectives before the reanimate economy buries you. ~20-30% game — a heist, not a matchup.

Kill-priority: Lokhust Destroyer units -> Reanimators -> soft characters (NOT the Void Dragon).

Deploy / positioning: Terrain/LOS so the gunline sees ONE Knight at a time. Volcano priority = the Destroyers, not the C'tan.

Code Chivalric (Deed | Quality): Reap a Tally (18 Lokhust = many units to thin) | Legacy Unsullied — target-rich for the tally; +2 OC for the grind

Necrons — Awakened Dynasty (triple-C'tan spam)

COIN-FLIP (lean unfavourable) · *Prevalence: High* · *They run: Take and Hold*

Better list: EVEN — It's an OC/points race either way. 2nd Castellán chips a C'tan faster; 2nd Lancer duels/pins one. Wash.

Deciding factor: 3 un-killable C'tan (4+/-1Dmg/Reanim). Nominally I out-hold OC4 with OC10 — BUT they're M10 FLY and reanimate, so 'out-OC' is shakier than it looks; win on POINTS not tabling, and don't over-trust the OC math.

The heist:

- Screen the Void Dragon (Anti-Vehicle 2+ wounds any Knight on 2s + heals off your hulls) away from melee.
- Lancer duels/pins the Nightbringer (4++ trades favourably; keeps the Dev scythe off a Questoris).
- Focus-fire ONE C'tan per turn to the floor (chip is refunded — overkill past reanimation); never split.
- Win the OBJECTIVE race: OC10/OC6 vs OC4, Tank Shock, out-hold. Grindy points win.

Kill-priority: None of the 3 C'tan get tabled — out-hold. Snipe Szeras / Skorpekh Lords if they lose Lone-Op screening.

Deploy / positioning: Play the mission, not the dice. Contest/flip the C'tan's objective with OC10.

Code Chivalric (Deed | Quality): Reap a Tally (soft support) — NOT the C'tan (too durable) | Legacy Unsullied — C'tan is a bad Deed target; +2 OC for the grind

Necrons — Obeisance / Monolith spam (faded)

COIN-FLIP · *Prevalence: Low* · *They run: Various*

Better list: A — Concentrate-to-kill Monoliths needs the 2nd Volcano's damage; spreading feeds reanimation.

Deciding factor: 3x Monolith T13 W22 2+ NO invuln + reanim. Monoliths ARE killable (Volcano wounds T13 on 3+, AP-5 through 2+; shieldbreaker Anti-Titanic 4+). 12 death rays chunk.

The heist:

- Concentrate ALL fire on ONE Monolith/turn — remove it outright (~27-33 focused beats ~2 reanim); never chip.
- Kill the Silent King early (reroll-1s + move engine, killable T10 W16).
- Rotate every turn; the Monoliths are M8 slow — kite and out-manoeuve.

Kill-priority: One Monolith at a time -> Silent King -> the rest.

Deploy / positioning: Concentrate-to-kill; spreading fire feeds reanimation.

Code Chivalric (Deed | Quality): Lay Low the Silent King (or Reap a Tally) | Martial Valour — concentrate-kill; re-rolls beat reanimation

Dark Angels — Darkflight/Ravenwing bike swarm

UNFAVOURABLE · *Prevalence: High* · *They run: Disruption*

Better list: A — Shoot the Storm Speeder mark-engine + Black Knight packs; a Lancer can't catch M12 fall-back-and-shoot bikes.

Deciding factor: 27 supercharged plasma talons (S9 AP-3 D2) + Chaplain 'Catechism of Fire' = Dev-Wound plasma (bypasses ion shield) + ~90 M12 bikes out-OC + fall-back-and-shoot.

The heist:

- Kill the STORM SPEEDER THUNDERSTRIKE first (Volcano) — it's the +1-to-wound MARK engine that makes the plasma volume lethal; remove it and the alpha drops from 'dead Knight' to 'chunked'.
- Deny the 9" bubble: deploy behind LoS blockers >24" back; keeping bikes >9" drops plasma from RF (3 shots -> 2) and halves the Dev math.
- Delete whole Black Knight packs with Avenger/thermal/RFBC BEFORE they get Catechism range; pop the 3 ATVs + Scouts (deny actions).
- Lancer = backfield linebacker hunting Scouts/ATVs/Command (not a centre dive — expect it kited by fall-back-shoot). Wall lanes with the hulls; win the ONE point OC10 owns. Bottom-tier matchup.

Kill-priority: Storm Speeder Thunderstrike (mark engine) -> Black Knight packs -> ATVs -> Scouts.

Deploy / positioning: LoS-block deep; their alpha is huge (Recon-Hunter Scouts 9" + M12 + Assault).

Code Chivalric (Deed | Quality): Reap a Tally (target-rich bikes) | Eager for the Challenge — out-manoeuver the M12 bikes + land the Lancer

Dark Angels — Deathwing Terminator brick

COIN-FLIP · *Prevalence: Medium* · *They run: Take and Hold*

Better list: B — Counter-charge the un-tableable 4++ bricks with a 2nd Lancer + assassinate the Termie Librarians; guns bounce off 2+/4++/-1Dmg.

Deciding factor: 3x un-tableable OC1 bricks (W4 2+/4++ -1Dmg + Armour of Contempt) — but I OUT-OC with OC10, and the killable scorers (Repulsor W16 no-invuln, Eradicators, Sternguard) die to my guns.

The heist:

- Out-OC: an OC10 Knight beats a whole OC5-8 brick on any objective — don't try to table the bricks, out-hold them.
- Delete the Repulsor (W16, dead in a turn), Eradicators + Sternguard + Scouts (W2-3) with volume guns.
- Never feed a Knight into a brick's charge — shoot OUT at -1 or fall back; Lancer counter-charges.
- Win the primary on raw OC.

Kill-priority: Repulsor -> Eradicators -> Sternguard -> Scouts (the killable scorers; ignore the bricks).

Deploy / positioning: Screen the Deathwing deep-strike (Navigator dome); out-OC bodies.

Code Chivalric (Deed | Quality): Lay Low the LION (standalone) if present, else Reap a Tally | Martial Valour — the Lion is directly killable; Azrael/Librarians are attached

Space Wolves — Librarius Conclave Terminator/Wulfen deathstar

UNFAVOURABLE · *Prevalence: Medium* · *They run: Take and Hold*

Better list: B — Counter-charge the thunder-hammer brick; 4++ Lancer trades where a Castellan dies. (SW now IN the sample: a Saga of the Beastslayer build went 5-0 at Bedburger Scheunen Kloppen 2026-07-25 — a Knight-hunting detachment, see the META entry.)

Deciding factor: 8 Assault-Terminator thunder hammers (S8 AP-2 D2 DEV) crack the no-melee-invuln Questoris (~12-14/charge); Sternguard Fusillade (Anti-Veh 5+ + Dev) punches the ion shield; out-bodies/out-OCs. (Half its melee is duds: Wulfen S5, Blood Claws S4.) OBSERVED 2026-07-25: a DIFFERENT SW build — Saga of the Beastslayer (Thunderwolf/beast-hunter) — went 5-0 at Bedburger Scheunen Kloppen. Its detachment tally targets enemy CHARACTER/MONSTER/VEHICLE units, so vs a Knight army it is a HUNTER BY DESIGN (every Knight is a VEHICLE) — a distinct,

arguably nastier melee threat than this Terminator deathstar; watch for it and treat it as at-least-as-UNFAVOURABLE.

The heist:

- Lancer counter-charge: its 4++ survives the hammers a Questoris can't; hold it to trade INTO a landed brick.
- BRICK-WALL CAVEAT: assassinating Logan/Ragnar/Librarians is only MARGINAL — it doesn't collapse a faceless 4++ wall. Kill a multiplier only if it strips a real buff; otherwise don't over-commit the Lancer.
- Focus-kill one brick BEFORE it lands (deep-strike + Celerity advance-charge); screen the drop with the Navigator dome + Helverin.
- SW terminators are M5-6 on foot — refuse-flank, out-OC where you can, race secondaries. Near hard-loss.

Kill-priority: Thunder-hammer Assault Terminators -> buff characters only if it strips a live multiplier.

Deploy / positioning: Screen deep-strike lanes; keep Knights >9" from Teleport Homers.

Code Chivalric (Deed | Quality): Reap a Tally (chars are attached — no Lay-Low) | Legacy Unsullied — out-OC help vs the brick wall

Blood Angels — Liberator Assault Group / Angelic Host jump-melee alpha

UNFAVOURABLE · *Prevalence: Medium* · *They run: Take and Hold*

Better list: B — TWO counter-charge blades vs the jump alpha — cover both drop lanes + double the assassin threat on Lemartes/Priests/Chaplains.

Deciding factor: Red Thirst (+2 S/+1 A on the charge) -> Death Company S10 fists, Sanguinary Guard S8 AP-3, Dev hammers; ~15-18 into a Questoris from one DC+Lemartes charge (no melee invuln); best-in-game delivery (M12 + Deep Strike + re-roll charge + Angelic-Host re-drop).

The heist:

- Deny the alpha, don't fight it: layered chaff/bubble-wrap so DC land 9"+ out, eat overwatch, can't reach T2. Castle T1-2.
- Avenger gatling OVERWATCH the drop (A18 S6 AP-2 into 2W-T4 DC) thins it before it swings.
- Lancer + EPIC CHALLENGE (1CP): charge the DC/Sang-Guard unit and Precision-kill the ATTACHED multiplier — Lemartes (-1 Dmg) / Sanguinary Priest (FNP5+/-1AP) / Chaplain. You CANNOT snipe them at range; alternatively clear the small unit to expose them.
- Win on the MISSION: out-OC massively (OC10/6 vs OC1 infantry). Do NOT try to table them.

Kill-priority: Lemartes -> Sanguinary Priests -> Chaplains (the buff engine) -> Death Company as it lands.

Deploy / positioning: Navigator dome + chaff screen the deep strike; never present an unscreened Knight to a 12"+charge.

Code Chivalric (Deed | Quality): Lay Low Dante/Lemartes VIA Lancer + Epic Challenge (attached) | Martial Valour — Epic-Challenge the buff-char in melee; else Reap a Tally

Thousand Sons — Grand Coven

FAVOURABLE · *Prevalence: Medium* · *They run: Priority Assets*

Better list: B (slight) — Lancer assassinates Magnus (the only real Knight-killer); a 2nd blade guarantees it. Otherwise the matchup is already favourable.

Deciding factor: Psychic-MW is THROTTLED in 11E (~5/turn via Doombolt, not spam); Rubrics are warpflamer anti-infantry (bounce off Knights); AP-2 volume is only S4. MAGNUS (T11 W16 2+/4++, S16 AP-3 Dev melee, two-rounds a Questoris) is the ONLY Knight-killer.

The heist:

- Refuse OR kill Magnus: screen and body-block his 14"+Time-Flux threat with an Armiger, OR dump a turn of Volcano+gatling into him (4++ + Impossible Form -1Dmg stretches it to ~2 turns).
- Keep Ion Shields up — the rest of the list literally lacks the S/AP to punch 26-28W Knights.
- Kill Sorcerers (throttle Doombolt) with the Avenger/RFBC; clear Rubrics/Scarab with volume.
- Out-OC on Priority Assets. Best matchup on the board (~55-60/40).

Kill-priority: Magnus (or refuse) -> Sorcerers (the ritual engine) -> Rubric/Scarab bodies.

Deploy / positioning: Don't feed an unscreened Knight to Magnus's melee. Watch Shadow Puppeteer (-1 to hit your best gun).

Code Chivalric (Deed | Quality): Lay Low MAGNUS (standalone Monster) | Martial Valour — Magnus is directly targetable + their only Knight-killer

Grey Knights — Banishers / Argent Assault (PRELIMINARY)

PRELIM · *Prevalence: Low* · *They run: Purge*

Better list: B — Counter-charge + assassinate casters throttles the MW; provisional (not deep-verified).

Deciding factor: PRELIM — not deep-verified. Elite 2+/4++ Terminators/Paladins + psychic Smite MW + best-in-game teleport/deep-strike. Likely coin-flip -> mild-unfav for Knights (MW + melee into no-invuln fight phase), hard for Sisters.

The heist:

- Kill the casters/character support to throttle the MW; screen the teleport (Navigator dome).
- Lancer counter-charge + assassinate a Grand Master/Librarian; out-OC (their bodies are few/OC1).
- NEEDS A FULL PASS before LSO — treat as provisional.

Kill-priority: Casters/characters -> Paladins/Terminators. (Provisional.)

Deploy / positioning: Screen deep-strike; provisional.

Code Chivalric (Deed | Quality): Reap a Tally (provisional) | Martial Valour — casters attached; out-remove (needs a full pass)

Chaos Space Marines — Renegade Raiders

COIN-FLIP · *Prevalence: Medium* · *They run: Reconnaissance*

Better list: **EVEN** — 2nd Lancer doubles the Vashtorr/Discordant assassin threat; 2nd Castellán shoots the Defiler + killable chassis. Wash.

Deciding factor: Record built on OBJECTIVES, not killing Knights. Anti-Knight is CONCENTRATED and killable: Vashtorr (Anti-Veh 4+ Dev hammer + +2 S aura to a Daemon-Vehicle Defiler) + Lord Discordant (free MW faucet). Dark Pacts = Lethal Hits.

The heist:

- T1: Lancer + a Volcano into VASHTORR before he beds into the Defiler's 3" Lone-Op bubble — one kill, two problems (he's the assassin AND the Defiler's +2 S battery).
- Kill the Lord Discordant next (T9 W10 4++) to shut off the free MW + wound-reroll enabler.
- Delete the killable chassis (Rhinos/bikes/Noise Marines); never sit engaged ON an objective (+1 AP near objectives).
- Out-tempo (you can't out-spread on Recon) — ~50/50.

Kill-priority: Vashtorr -> Lord Discordant -> Defiler -> killable scorers.

Deploy / positioning: Don't clump kills near a Vengeance-style reactive piece; watch Dark-Pact Lethal Hits.

Code Chivalric (Deed | Quality): Lay Low Vashtorr / Lord Discordant (standalone) | Martial Valour — both are their own units -> directly killable

Emperor's Children — Frenzied Host + Court of the Phoenician

EXPECT-A-LOSS (winnable) · *Prevalence: Medium* · *They run: Priority Assets*

Better list: **EVEN** — 2 Castellán blast the Defiler pair (the real killer) off T1-2; 2 Lancer counter-charge the Infractor/Maulerfiend swarm AND hunt Defilers in melee. Genuinely balanced — the #1-tie matchup.

Deciding factor: Elite MELEE. Fulgrim (T11 W16 2+/4++, -1 to hit, Fights First) deletes a Knight/turn AND shrugs your guns (~2 dmg/Volcano shot). Defiler + Flawless Blades (AP-4) butcher. Thrill Seekers = advance-and-charge threat ranges.

The heist:

- CONCEDE Fulgrim: body-block his lane with an Armiger/wreck so he reaches ONE target/turn, never the same Knight twice. Do NOT Rotate vs him (useless in melee) and do NOT try to kill him.
- T1-2: shoot the SUPPORT melee off before it connects — Defiler (5++, no -1-to-hit, dies to concentrated Volcano/thermal), then Flawless Blades + Noise Marines with the Avenger.

- Win on PRIMARY: Priority Assets, OC10 Questoris sit on objectives; Lancer runs down the cheap OC screen (Spawn/Noise Marines) — trade a Knight/turn to Fulgrim while out-scoring the defanged swarm.
- Close primary loss / draw-range if executed; blowout if Fulgrim reaches two Knights a turn.

Kill-priority: Defiler -> Flawless Blades -> Noise Marines / Infractors (NOT Fulgrim).

Deploy / positioning: Screen Fulgrim's lane (standalone Monster — shootable, but a 4++/Fights-First beatstick, so avoid melee). Use the Lancer + EPIC CHALLENGE (1CP) to Precision-kill an ATTACHED Lord Exultant in melee — not Fulgrim.

Code Chivalric (Deed | Quality): Lay Low: Fulgrim / Keeper of Secrets (standalone Monsters) | Martial Valour — reliable standalone kill + consistent guns to delete Defilers

Drukhari — Skysplinter Assault + Exhibition of Slaughter

FAVOURABLE · *Prevalence: Medium* · *They run: Reconnaissance*

Better list: A — 2 Castellan one-shot the fragile Raiders/Ravagers + gun the Scourges — removal-race shreds the paper army faster than a 2nd blade.

Deciding factor: Durability mismatch in MY favour: Volcano one-shots their no-invuln Raiders/Ravagers (T8-9); their Incubi/Exhibition Lethal Hits are NON-Vehicle (don't touch Knights); no haywire = thin invuln-bypass. 13 dark lances chip ~1 Knight/turn but can't table me.

The heist:

- Kill the two Scourge units (8 of 13 lances) first, then the Ravager (Volcano one-shots) and Lady Malys.
- Rotate the focused Knight (make their lances fail on 1/2, not 2/3).
- Contest-don't-chase: they out-spread me on Recon with ~90 fast bodies — plant OC10 on the 2-3 objectives that matter, gun their scorers off the rest.
- Weather the T2 lance alpha (hull-down T1) and grind their paper army off T3-5.

Kill-priority: Scourges -> Ravager (lances) -> Lady Malys -> Raiders/Venoms.

Deploy / positioning: Reserve/hull-down T1 to blunt the lance alpha; don't over-expose.

Code Chivalric (Deed | Quality): Reap a Tally (fragile paper -> R1) | Eager for the Challenge — fast tally + Eager to match their speed

Adeptus Custodes — Lions of the Emperor + Might of the Moritoi

FAVOURABLE · *Prevalence: Medium* · *They run: Take and Hold*

Better list: B — Lancer melee (S20 vs 2+/4++) + character assassination beat the elite brick where volume shooting only chips; the anti-Knight guns are thin, so you can afford to trade a Castellan.

Deciding factor: 'So few models' (~40, tanky-per-model 2+/4++ but W2-4). Anti-Knight is THIN (one Caladius ~6/turn; guardian spears S7 wound me on 5+). Might

of the Moritoi is Walker-only = dead (no Dreadnoughts). I OUT-OC (OC10 vs OC2) + grind them off.

The heist:

- Volume guns (Avenger A18 / RFBC / plasma) into the Custodian bodies — do NOT Volcano a W3 Custodian (overkill); save Volcano/thermal for the Caladius + characters.
- Lancer SWEEP (A10 S10 AP-2 D3) chews Custodes squads (wounds T6 on 2+).
- Out-OC every objective (OC10 vs OC2) and table their ~40 models over the game — the removal race is winnable.
- Just dodge their melee (S5-7 butchers if it connects).

Kill-priority: Caladius (their one gun) -> characters -> bodies with volume.

Deploy / positioning: Out-body/out-OC; right gun per target (volume into bodies, big guns into the tank).

Code Chivalric (Deed | Quality): Reap a Tally (their chars attach to units) | Martial Valour — Lay-Low unreliable; re-roll volume chips the 2+/4++

Leagues of Votann — Delve Assault Shift + Hearthguard Covenant / Hearthband

COIN-FLIP · *Prevalence: Medium* · *They run: Priority Assets*

Better list: A — Kill the Land Fortresses (rail) + plasma bricks at range; the guns clear the T6 Beserks wholesale. (1 Lancer still handles the maul drop.)

Deciding factor: Judgement Tokens DON'T exist in 11E (army rule = Prioritised Efficiency, +1 Hit near objectives). Their SHOOTING can't crack me (2 Heavy magna-rail cannons). The danger is the deep-striking Cthonian Beserk maul-swarm — mauls have ANTI-VEHICLE 3+ (wound me on 3s) in the no-melee-invuln fight phase.

The heist:

- Never expose a lone Questoris to a 9" Beserk drop-charge (re-rollable via Yield Points): screen with the Armiger, hug terrain, keep big Knights back T1-2.
- Kill BOTH Land Fortresses T1-2 (T12 W16 no-invuln — Volcano ~one-shots) -> removes their entire anti-tank; then their shooting is harmless.
- My guns delete the T6 W1 Beserks wholesale (feet + gatling); Lancer 4++ tanks the maul swarm and breaks blocks.
- Race the clock before they hit 7 Yield Points; contest, don't sit.

Kill-priority: Land Fortresses -> Berehk / Kahl -> Beserks with volume.

Deploy / positioning: Screen the deep-strike landing zones; a Beserk that can't charge does nothing.

Code Chivalric (Deed | Quality): Reap a Tally (kill Land Fortresses + bricks) | Martial Valour — target-rich; Uthar/Kahl are attached so not Lay-Low

Tyranids — Talons of the Norn Queen + Assimilation Swarm (5-Norn)

COIN-FLIP · *Prevalence: Medium* · *They run: Take and Hold*

Better list: EVEN — 2nd Volcano one-shots no-invuln Emissaries; 2nd Lancer S20 kills monsters + assassinates a Norn. Slight B on the melee, slight A on the guns.

Deciding factor: 5 Norns (T11 W16, M10) with Singular Purpose OC15 ANCHORS (out-hold me), harpoon melee (S12 AP-3 into no-invuln Questoris), and healing. Emissaries have NO invuln (Volcano one-shots); Assimilators are 4++.

The heist:

- Focus-kill the no-invuln Emissaries at RANGE (Volcano/thermal one-shot); grind the 4++ Assimilators.
- OC15 anchors mean the primary is a KILL-RACE, not an OC race — I must physically remove the anchoring Norn to take its objective.
- Refuse the melee gang: kite on M10-14, never let 2+ Norns pile one Knight; Lancer assassinates a Norn on the charge.
- Kill the Neurotyrant + Zoanthropes (synapse/heal/psychic engine); win on kills + secondaries.

Kill-priority: Emissaries (no-invuln) -> Neurotyrant / Zoanthropes -> Assimilators (grind).

Deploy / positioning: Space to deny the harpoon hook-and-charge (+2 to their charge); don't cluster.

Code Chivalric (Deed | Quality): Lay Low a NORN / Emissary (standalone Monster) | Martial Valour — Norns are their own units -> Lancer/Volcano kill directly

T'au Empire — Experimental Prototype Cadre + Kauyon

UNFAVOURABLE · *Prevalence: Medium* · *They run: Priority Assets*

Better list: A — Same logic — out-shoot the rail/fusion/markerlight platforms.

Deciding factor: The ceiling anti-Knight SHOOTING: railguns (S20 AP-5 D6+6 DEV WOUNDS — crit-mortals bypass the ion shield) + markerlight-boosted AP-3 volume + 6 Farsight fusion + rail rifles (Dev). A markerlit Kauyon alpha = ~30-40 into one Knight (dead, Rotated or not). Fire-and-Fade evasion neuters my melee.

The heist:

- Kill the HAMMERHEADS (2 railguns, T10 W14 NO invuln — Volcano deletes one/turn) + the Sunforge fusion suits (T5 W4) EARLY.
- Deny the Kauyon+markerlight alpha turn: terrain/reserves/LoS so they can't focus an un-Rotated Knight.
- Rotate the most-lit Knight; never present a clean focus target; their guns are the wrong-shaped for chaff but Dev/railgun bypass the invuln.
- Out-OC on Priority Assets IF I survive — their OC is modest. Expect to be behind; steal on tempo.

Kill-priority: Hammerheads (railguns) -> Sunforge (6 fusion) -> Riptides/Ghostkeels -> markerlight Pathfinders.

Deploy / positioning: Reserves + LoS-block vs the Kauyon turn; kill the mark/railgun platforms first.

Code Chivalric (Deed | Quality): Reap a Tally | Martial Valour — same — chars attached; out-shoot

Adeptus Mechanicus — Lords of the Forge + Rad-Zone Corps

UNFAVOURABLE · *Prevalence: Medium* · *They run: Priority Assets*

Better list: A — Out-shoot the gunline — 2 Castellans delete an Ironstrider/Skorpius/Kataphron brick per turn. (B's Lancer-into-a-brick is viable but you win the removal race with guns.)

Deciding factor: Kataphron Breachers' Heavy arc rifles = ANTI-VEHICLE 4+ (wound my T11-12 on 4+ regardless of S) + Lethal Hits + Cawl reroll -> 2 bricks = ~1 dead big Knight/turn, negating both my pillars (T beaten on 4+, 5++ fails 68%). Rad-Zone = chip-MW/battle-shock, NO Toughness reduction. Out-bodied.

The heist:

- Range-deny: Heavy arc rifle wants 15" (Rapid Fire 2 doubles its shots); Kataphrons are M5" SLOW. Deploy behind terrain, stay outside 15" BR1, Rotate the exposed Knight.
- Win the race on ONE brick: Kataphrons have NO invuln/FNP -> dump all guns + a charge to remove a 6-model brick BR1-2 (cuts anti-Knight output ~40%). Don't spread fire.
- Lancer as a wrecking ball INTO a brick (shreds T7 W3 + pins them so they shoot the Lancer, not the gun-Knights).
- Concede the OC war; keep it close, need Hazardous plasma self-wounds + Rotate to swing.

Kill-priority: One Kataphron brick at a time -> Cawl/Manipulus (if reachable).

Deploy / positioning: Stay outside 15"; kill the first brick before it doubles up.

Code Chivalric (Deed | Quality): Reap a Tally (target-rich -> R1-2 Honoured) | Martial Valour — many fragile units = fast tally + early CP tempo

Orks — Kult of Speed / More Dakka

UNFAVOURABLE · *Prevalence: Medium* · *They run: Disruption*

Better list: A — Shoot the tough hulls (Kill Rigs/Wazdakka/Stompa) — the Lancer can't out-clear fast dakka; more guns help.

Deciding factor: Fast dakka: 18 Deffkopta rokkits + Speshul Ammo ([Anti-Vehicle 4+] wounds T11-12 on 4s regardless of S) + Mobile Dakkastorm (+2 S). ~1 Knight/turn once koptas range in; out-BODIES + out-mobiles on Disruption; my guns are the wrong shape to clear the koptas (Avenger ~2/turn; 18 koptas = 9 turns).

The heist:

- Rotate-cycle to survive the focus (they kill a non-Rotated Knight; save one with the 4++).
- Kill the tough hulls (Kill Rigs T10 W16, Wazdakka, Trukks) with the big guns — the koptas you can't out-clear.
- Lancer contest/distraction (a 'distraction carnifex' that forces their fast wall to react).
- Accept the underdog; steal on mobility secondaries + a lucky Rotate run.

Kill-priority: Kill Rigs -> Wazdakka -> Trukks (koptas are un-clearable — don't chase).

Deploy / positioning: Underdog. Concede the body war, race the mission.

Code Chivalric (Deed | Quality): Reap a Tally (kill fast chaff units) | Legacy Unsullied — +2 OC vs the mobile board; tally off their many units

Orks — Green Tide (~100-165 bodies)

AUTO-LOSS · *Prevalence: Medium* · *They run: Take and Hold*

Better list: B (weak) — Loss either way (accept it). 2nd Lancer sweep clears more Boyz + 4++ survives the inevitable tar-pit marginally better. Low decision weight.

Deciding factor: ~100-165 bodies (Mob Mentality 5++ at 10+ models, no Boyz return). 6-9 Knights CANNOT out-body / out-OC / clear it; the guns are the wrong shape. A known HARD COUNTER and a top all-comers list.

The heist:

- No reliable heist — ACCEPT it as a feature of 40k, not a list flaw.
- Play the mission, minimise the loss margin, and hope to dodge it in the Swiss.
- Do NOT warp the list to patch this at the cost of the 90% you win.

Kill-priority: n/a — you cannot clear enough.

Deploy / positioning: Accept the matchup; a respectable loss is the goal.

Code Chivalric (Deed | Quality): Reap a Tally (kill 2 chaff units R1) — NOT Lay-Low (Ghaz is attached) | Legacy Unsullied (+2 OC) — you're massively out-OC'd; +2 OC is your only objective lever

Space Marines (Salamanders) — Forgefather's Seekers flamer-brick

FAVOURABLE · *Prevalence: Low* · *They run: Various*

Better list: A — Kill BOTH Land Raiders + the W2-3 bodies with volume — the shooting build out-guns the melta brick.

Deciding factor: Their durability is a PAPER TIGER vs Knight guns: Land Raiders T12 W16 2+ NO invuln (Volcano ~one-shots), everything else W2-3. Flamers do nothing to T11-13. Anti-Knight spikes to ~15-22 ONLY if I feed a Knight <12" into an Immolation-Protocols Dev flamer dump.

The heist:

- Kill BOTH Land Raiders T1-2 (Volcano/thermal — no invuln) -> strips their army fast.
- Respect the 12" flamer bubble — space >12" and their anti-Knight collapses to ~2-4.
- Grind the W2-3 bricks off with volume; out-durable + out-gun. Good-to-very-good matchup.

Kill-priority: Land Raiders -> Vulkan / multi-meltas -> infantry.

Deploy / positioning: Stay >12" from the flamer bricks; delete the taxis first.

Code Chivalric (Deed | Quality): Reap a Tally (Land Raiders + W2-3 units) | Martial Valour — target-rich + consistent removal

Chaos Knights — Bastions of Tyranny + Houndpack Lance (PRELIMINARY)

PRELIM · *Prevalence: Low* · *They run: Reconnaissance*

Better list: EVEN — Mirror — trade gun-Knights (A) vs duel their War Dog/Lancer packs (B). Practice-dependent.

Deciding factor: Mirror — same chassis (S20 shock lances both ways) + Chaos adds Dreadblades / dark rites / War Dog melee packs. User is CONFIDENT ('Chaos Knights are struggling'). Not deep-verified.

The heist:

- Mirror fundamentals: Rotate, out-shoot with the 2 Castellans, Lancer duels their Lancer/War Dogs.
- Out-OC with the Questoris; kill their gun-Knights first (Volcano trades up).
- PRELIMINARY — user-confident, low priority. Full pass only if it trends up.

Kill-priority: Their gun-Knights -> War Dog packs. (Provisional.)

Deploy / positioning: Mirror; provisional.

Code Chivalric (Deed | Quality): Lay Low their gun-Knight (standalone) | Martial Valour — mirror — their Knights are targetable characters

T'au Empire — Retaliation Cadre (deep-strike fusion/rail alpha) — TOP-5 OBSERVED

UNFAVOURABLE · *Prevalence: High* · *They run: Purge the Foe*

Better list: A — Pure ranged war. 2 Castellan out-gun the Crisis/Riptide/Broadside; a 2nd Lancer can't catch fire-and-fade T'au. Clear A.

Deciding factor: The DOMINANT T'au build in the sample (5/75). Deep-strike alpha: 4-5 Commanders + Crisis Sunforge (fusion S9 AP-4 D6), Broadside heavy rail (S12+ AP-4 Dev), Twin Lance, 2x Riptide ion accelerator, markerlight support. A markerlit 9" Sunforge/Crisis drop dumps ~25-35 into ONE Knight (fusion D6 + rail Dev bypass the ion shield). Fire-and-Fade neuters melee.

The heist:

- NAVIGATOR DOME IS LOAD-BEARING: the 12" anti-Deep-Strike bubble denies the Sunforge/Crisis 9" drop — the single biggest swing in the matchup. Deploy it central.
- Kill the Broadside + Riptides at range (Volcano/plasma) before markerlights stack; delete Pathfinders (the mark engine) with the Avenger.
- Rotate the most-lit Knight each turn; never present a clean un-Rotated focus target; LoS-block the alpha turn.
- Out-OC on the ground (T'au OC is modest) IF you survive the alpha — steal the primary while their suits reposition.

Kill-priority: Broadside / Riptides (rail+ion) -> Sunforge fusion suits -> markerlight Pathfinders -> Commanders.

Deploy / positioning: Navigator dome central; reserves + terrain vs the drop; kill mark/rail platforms first.

Code Chivalric (Deed | Quality): Reap a Tally (kill suit/Pathfinder units) | Martial Valour — Lay-Low is a trap (commanders hide in Crisis units); win the gun race

Chaos Daemons — Blood Legion — Bloodcrusher cavalry + Bloodthirster

COIN-FLIP · *Prevalence: Medium* · *They run: Purge / Disruption*

Better list: B — 2 Lancers counter-charge the Bloodcrusher cav + one duels the Bloodthirster (4++ trades). The cav out-runs a gunline read.

Deciding factor: Fast MELEE alpha: 3x Skullmaster + Bloodcrusher Juggernaut cav (T6 W4, charge bonuses) + Bloodthirster (T10 W18 FLY, great axe S16 AP-3 Dev) + Rendmasters. Daemonic 5++ everywhere; charges into the no-melee-invuln Questoris. (Nurgle variant = Plaguebearer grind, slower, out-hold problem not a kill problem.)

The heist:

- Shoot the Bloodcrushers (T6 W4, no armour help — gatling/plasma/RFBC) OFF before they charge; each un-charged Juggernaut pack is ~0 threat.
- Screen the Bloodthirster's lane; Lancer DUELS it (4++ trades favourably, S20 one-rounds a wounded 'Thirster) rather than eating its charge on a Castellan.
- Rotate the exposed Knight vs the (modest) ranged; out-OC the cav once thinned.
- vs Nurgle grind: ignore the tarpit, out-shoot Plaguebearers off objectives, win on tempo.

Kill-priority: Bloodthirster (or screen) -> Bloodcrushers pre-charge -> Skullmasters / Rendmasters.

Deploy / positioning: Layer chaff/Armiger vs the charge; keep a Lancer free to counter-punch the cav.

Code Chivalric (Deed | Quality): Lay Low the Bloodthirster (standalone Greater Daemon) | Martial Valour — directly killable; guns + Lancer

Astra Militarum — Steel Hammer superheavies / Grizzled artillery — OBSERVED

COIN-FLIP · *Prevalence: Medium* · *They run: Priority Assets*

Better list: A — A straight firepower duel — 2x Volcano (S18) out-range/out-damage the superheavies. The matchup List A is built for.

Deciding factor: A SHOOTING brawl in my lane:

Baneblade/Banesword/Stormsword (CHARACTER via Steel Hammer) + lascannon sponsons, or Shadowsword (Volcano cannon S16 AP-4 D6+6 — one-shots a Knight) + 3 artillery + Leman Russ. High-S anti-Knight, but the superheavies are KILLABLE (T12-14 W22-24, no invuln) and SLOW.

The heist:

- Win the gun duel: 2x Volcano (S18) out-ranges/out-damages their superheavies — delete the Shadowsword (the one thing that one-shots you) FIRST, then the lascannon platforms.
- Rotate vs the alpha; hull-down T1; their artillery is indirect (worse into a moving Knight in cover).
- Out-maneuvre the M9-10 tanks + out-OC (Guard infantry is chaff you gun down); race the mission.
- This is the matchup the 2-Castellan build is BUILT for — a straight firepower race.

Kill-priority: Shadowsword (Volcano cannon) -> lascannon superheavies -> artillery -> Leontus.

Deploy / positioning: Hull-down + Rotate T1; concentrate Volcanoes on the biggest gun each turn.

Code Chivalric (Deed | Quality): Lay Low a SUPERHEAVY (Character via Steel Hammer + Titanic!) | Martial Valour — shielddbreaker + Volcano delete it -> Honoured; win the gun duel

Space Marines (Iron Hands) — Hammer of Averni — Assault Terminator hammer brick — OBSERVED

COIN-FLIP · *Prevalence: Medium* · *They run: Purge the Foe*

Better list: B — 2nd Lancer counter-charges the 10-model hammer brick (4++ survives the hammers a Castellan can't) + a 2nd assassin for Feirros/characters.

Deciding factor: 10-model Assault Terminator thunder-hammer brick (S8 AP-2 D2, ~12-16 into a no-invuln Questoris on the charge) delivered by deep-strike + Celerity advance-charge, Feirros durability, Ballistus/Repulsor lascannon backfield. The brick is the only real Knight-killer; the rest is chaff/scorers.

The heist:

- Screen the deep-strike (Navigator dome) + shoot the hammer brick BEFORE it lands (Avenger/RFBC into 2W-2+ Terminators — volume forces the 4++).
- Lancer counter-charges the landed brick (4++ survives hammers a Castellan can't); never feed a Questoris into its charge.
- Delete the Repulsor/Ballistus (lascannon) + Sternguard with the big guns; out-OC the ~30 bodies.
- Win on the mission — the brick can't be everywhere; contest what it isn't on with OC10.

Kill-priority: Repulsor/Ballistus (lascannon) -> hammer brick as it lands -> Sternguard -> Scouts.

Deploy / positioning: Navigator dome vs the drop; hold the Lancer to counter-charge the brick.

Code Chivalric (Deed | Quality): Reap a Tally (kill the backfield lascannon/scorers) | Martial Valour — Feirros/Librarians attached; out-remove the soft units

Imperial Fists — 'Great Value' — Emperor's Shield + Librarius Conclave (the LSO target)

COIN-FLIP · *Prevalence: Target* · *They run: Priority Assets (opp), you play Meatgrinder*

Better list: A — The LSO target: a firepower + mission race. 2nd Castellán strips the Sternguard/Land-Speeder enablers faster and breaks the Oath convergence — out-gun, out-mobile.

Deciding factor: Unsaveable Sternguard Dev (full wound-reroll vs Oath) + sticky OC10 Intercessors + an OC34 Lysander Terminator brick (NOT battle-shock-immune, but Knights have no way to force a test) + Armour of Contempt + a ~30-34 Oath-convergence alpha. Sisters 98-31 lesson: durable + sticky + volume.

The heist:

- Navigator dome (12" anti-Deep-Strike) blunts his Teleport-Homer / Land-Speeder deep-strike alpha.
- BREAK the Oath convergence: Volcano/thermal the Land Speeders (deep-strike enablers) + the Sternguard FIRST; firepower-as-denial strips his soft OC.
- Out-mobile the M5 bricks — his OC34 brick can't be everywhere; contest the objectives it isn't on with OC10 + the Lancer threatening his home.
- Start from EXPECTATION OF A LOSS; steal via mobility secondaries. Honest coin-flip (~55-56 vs 62 in the hardened sim).

Kill-priority: Land Speeders (enablers) -> Sternguard (unsaveable Dev) -> break the brick's character support.

Deploy / positioning: Navigator home-hold + deploy Hidden; don't over-expose to the alpha convergence.

Code Chivalric (Deed | Quality): Reap a Tally (kill his soft legs: Speeders/Sternguard/Vanguard) | Legacy or Martial Valour — his chars hide in bricks; kill the mobile OC + out-remove

Imperial Knights — 2 Castellán / 1 Lancer (the shooting MIRROR)

COIN-FLIP (mirror — first-turn dependent) · *Prevalence: Med (3)* · *They run: the gun-Knight mirror (2 Volcano Castellans + a Lancer)*

Better list: B — MELEE bypasses the enemy Ion Shield (no melee invuln on their Castellans), so more LANCERS = the better Knight-killer; List A's shooting gets Ion-Shielded. A ~even mirror, but B's 2nd Lancer is the sharper tool.

Deciding factor: A shooting slugfest that's ~EVEN by definition (it's a mirror): first turn, cover (-1 to hit), and the Ion-Shield-cycling race decide it. THE KEY: shooting into a Knight gets Ion-Shielded (5++, Rotate 4++), but MELEE does NOT — Questoris/Dominus have no melee invuln — so the efficient kill is the LANCER charging a Castellán (S20, no invuln), not out-shooting the 4++. (Sim note: this reads as B-favoured because more Lancers = the better mirror tool; the absolute is a relative indicator, the real mirror is a coin-flip.)

The heist:

- WIN THE ROLL-OFF / seize — first-turn Volcano into an un-Rotated Castellán is the swing.
- Rotate Ion Shields onto the focused Knight every turn (4++ vs their Volcanos); fight from cover (-1 to hit).
- Send the Lancer into a Castellán in MELEE (no invuln there) — that's your most efficient Knight-kill; don't rely on Ion-Shielded shooting.
- Race the mission — 5 big models each means objectives are decided by positioning + who commits the Lancer.

Kill-priority: Enemy Castelláns (their guns) -> the Lancer -> Armigers. Lancer-assassinate a Castellán in melee.

Deploy / positioning: Cover + first-turn positioning; hide the focused Knight; the Navigator holds home.

Code Chivalric (Deed | Quality): Lay Low the Tyrant (name an enemy Castellán — it's standalone/Titanic, you CAN kill it) | Martial Valour — the shooting amplifier for the gun mirror; the Lancer finishes the named Castellán in melee

Imperial Knights — 1 Castellán / 2 Lancer (the melee MIRROR)

COIN-FLIP (lean unfav for List A) · *Prevalence: Med (2)* · *They run: 2 fast Cerastus Lancers + a Castellán*

Better list: B — List B's 2 Lancers match their 2 Lancers (4++ slugfest) and reach with M14; List A's shooting into 4++ Lancers is inefficient and its lone Lancer is out-numbered. B is built for this.

Deciding factor: Their two Cerastus Lancers (M14, 4++ ALL-around, S20 AP-3 D8) hunt you, and your shooting into a 4++ Lancer is inefficient. You out-gun them (2 Castelláns vs 1), but killing a fast 4++ Lancer at range before it charges is slow — and your lone Lancer is out-numbered in the melee trade. This is the matchup List B (2 Lancer) is built for; List A is on the back foot.

The heist:

- Focus a Lancer with everything T1-2 (2 Volcanos + Crusader + Helverins) — but expect the 4++ to drag it out; Rotate + kite the other.
- Your Lancer counter-charges one of theirs (4++ vs 4++ trade); don't feed a Castellán into their Lancers (no melee invuln = you die).
- Screen the charge lanes with the Helverin/Crusader; use Super-Heavy Walker to fall-back-and-shoot out of a Lancer's grip.
- Out-score on the mission while trading — you won't cleanly out-fight two Lancers.

Kill-priority: Enemy Lancers (the M14 melee threat) -> Castellán -> Armigers.

Deploy / positioning: Screen the Lancer charge lanes; kite; keep the Castelláns out of the 14"+charge threat.

Code Chivalric (Deed | Quality): Lay Low the Tyrant (name an enemy Lancer — kill it before it kills you) | Eager for the Challenge — +2"M/+1 Adv&Charge to out-position their M14 Lancers + guarantee your Lancer's counter-charge

APPENDIX — VERIFIED 11E PROFILES (the numbers behind the sim)

- **Knight Castellan (425 / 450 escalating):** M8 T12 Sv3+ W28 OC10, 5+ inv vs RANGED only — No melee invuln.
- **Volcano lance:** 72" | D3 | S18 | AP-5 | D6+8 | Blast — D3 SHOTS (avg 2) — one-shots no-invuln T10-14.
- **Plasma decimator (supercharge):** 48" | D6+3 | S9 | AP-4 | D3 | Blast, Hazardous — Anti-elite volume (~6.5 shots).
- **Shieldbreaker missile:** 72" | 1 | S12 | AP-6 | D6+1 | Anti-Titanic 4+, Dev Wounds — Anti-TITANIC (enemy Knights/superheavies) + tank sniper — NOT an infantry-character sniper (no Precision).
- **Knight Crusader (395):** M10 T11 Sv3+ W26 OC10, 5+ inv vs RANGED only
- **Rapid-fire battle cannon:** 72" | D6+3 | S10 | AP-1 | D3 | Blast, RF D6+3 — Anti-infantry/light.
- **Avenger gatling cannon:** 36" | 18 | S6 | AP-2 | D2 — A18 strips soft OC.
- **Thermal cannon:** 24" | 2D3 | S12 | AP-4 | D6 | Blast, Melta 6 — Anti-tank / Speeders.
- **Cerastus Knight Lancer (415):** M14 T11 Sv3+ W28 OC10, 4+ inv vs ALL — Full melee invuln — the key.
- **Shock lance — strike:** Melee | 5 | WS2+ | S20 | AP-3 | D8 | Lance — Wounds <=T12 on 2s; deletes any non-Titanic.
- **Shock lance — sweep:** Melee | 10 | WS2+ | S10 | AP-2 | D3 — ~5-7 MEQ/turn into hordes.
- **Shock Charge:** free Tank Shock (0CP, repeatable) on the charge — Bonus mortal wounds on the charge.
- **Armiger Helverin (140):** M12 T9 Sv3+ W14 OC6 — 2x autocannon 48" 4 S9 AP-1 D3; Suppression -1 to hit.

Key enemy anti-Knight weapons

- **AdMech Kataphron heavy arc rifle:** 30" | 2 | S8 | AP-2 | D3 | Anti-Vehicle 4+, RF2 — Wounds Knights on 4s regardless of S. Range-deny (RF2 <=15").
- **AdMech Ironstrider twin cognis lascannon:** 48" | 2 | S12 | AP-3 | D6+1 | Sus1, Twin — Volume anti-tank.
- **AdMech Skorpius ferrumite cannon:** 48" | 3 | S12 | AP-3 | D6+1 — +1 hit vs Mon/Veh.
- **T'au Hammerhead railgun:** 72" | 1 | S20 | AP-5 | D6+6 | Heavy, Dev Wounds — Dev crit-mortals bypass the ion shield.
- **T'au Broadside heavy rail rifle:** 60" | 2 | S12 | AP-4 | D6+1 | Heavy, Dev
- **T'au Crisis Sunforge fusion:** 12" | 1 | S9 | AP-4 | D6 | Melta 2 — Re-rolls wound+dmg vs Mon/Veh; the deep-strike killer.
- **EC Defiler ectoplasma destructor:** 36" | D6 | S12 | AP-3 | D3 | Blast — Plus shearing claws MELEE 5A S16 AP-3 D6+1 (anti-Knight).
- **EC Maulerfiend fists:** Melee | 6 | S14 | AP-2 | D6+1 — Fast melee, wounds Knights on 3-4s.
- **Custodes guardian spear:** Melee | 5 | WS2+ | S7 | AP-2 | D2 — Wounds Knights on 5+ — thin anti-Knight.

- **Custodes Caladius blaze cannon:** 48" | 4 | S12 | AP-3 | D6+2 | Twin — Their one real gun.
- **Ork power klaw / Gork's Klaw:** Klaw S9 AP-2 D2 (Meganob S10) / Ghaz S14 AP-3 D4 — Klaw wounds Knights on 5s (volume); Ghaz on 3s.
- **Ork Squighog big choppa:** Melee | 4 | S6 | AP-1 | D2 | Anti-Vehicle 4+ — Wounds Knights on 4s.
