

IMPERIAL KNIGHTS — Knights — 2 Castellan / 1 Lancer / 1 Crusader**Detachments**

Valourstrike Lance + Dominus Foebreakers (3 DP)
 Purge the Foe (RECOMMENDED for the broad field) — or Dominus's Priority Assets are granted). Purge rewards kill action-heavy trap for a 5-6-model army (25 VP in Actions home-steal.

Disposition

1,970 / 2000 (30 spare) — MFM points: Castellan 425 + 4 Helverin 140 + Navigator 75 = 1,915, + Archeotech Autocannon Armiger' was an error from stale BSData points). NO Lancer

Total

Firepower-as-denial is the Knight win-con. TWO Volcano Lance shooting core that deletes no-invuln anchors and strips s counter-charge blade. User law: do NOT trade a Castellan the shooting kills melee linchpins at range before they cc even 2 blades can't heist a 4++ brick wall. Both Castellan over the 2-Lancer variant).

Rationale

Unit	x	Wargear
Knight Castellan	2	Volcano lance (D3 shots S18 AP-5 D6+8), plasma decimator (D6+3 shots), 2x twin meltagun, 2x shieldbreaker, twin siegebreaker, feet
Knight Crusader	1	Rapid-fire battle cannon (D6+3 S10, +15pts), Avenger gatling (A18 S6 AP-2 D2), heavy flamer, thermal cannon (2D3 S12 AP-4 Melta6), stubber,
Cerastus Knight Lancer	1	Shock lance — strike 5A S20 AP-3 D8 [Lance] / sweep 10A S10 AP-2 D3; ranged shock lance 12" 6A [Assault, Sus2]
Armiger Helverin	1	2x Armiger autocannon (48" A4 S9 AP-1 D3), heavy stubber
Navigator (Agents ally)	1	Gaze of the Empyrean

ENHANCEMENTS to add (fix the list to 2000; Rotate is free)

Enhancement	On	Pts

Archeotech Autoloaders [TA	Knight	25
Blessed Plate [TAKEN — Cas	Knight	30

Crusader (shooting-dominant)

Priority Assets. Take-and-Hold is NOT legal for this combo (only Valourstrike's Purge + Ling (the list's identity) and only 1/5 of its missions needs an Action; Priority Assets is an ally you can't spare). Lock Priority Assets ONLY if you expect the Great-Value Vital-Link

150 (escalating) + Crusader 410 (395 +15 RFBC) + Cerastus Lancer 415 + Armiger Autoloaders 25 + Blessed Plate 30 = 1,970. ONE Armiger (the correct build — the earlier '2nd Crusader's Sigil. All points MFM-verified (1,970/2000 from data/mfm/imperial-knights.json).

ances (S18 AP-5 D6+8) + plasma decimators + the Crusader's RFBC/Avenger = a soft OC. The SINGLE Cerastus Lancer (4++ full invuln, M14) is the one decapitation / 1's worth of shooting for a 2nd Lancer. RE-VERIFIED (2026-07-26): 1 Lancer is correct — connect; a 2nd Lancer surrenders a Volcano the hard shooting/OC matchups need, and units carry DOMINUS, so Dominus Foebreakers actually buffs TWO Knights here (an edge

~Pts	Role in the plan
425 + 450	The shooting core (escalating: 1st 425, 2nd 450). 2x Volcano (D3 shots ea, ~23 dmg) one-shots no-invuln anchors + snipes; plasma decimator anti-elite; +1 hit vs terrain (Dominus). #1 bears Archeotech Autoloaders (re-roll
410	395 base + 15 for the RFBC. Anti-infantry SUBTRACTION: RFBC + Avenger A18 strip soft OC; thermal for anti-tank/Speeders.
415	The one blade: 4++ FULL invuln vs ALL, M14 W28. Counter-charge + kill characters (standalone monsters/Titanic DIRECTLY; ATTACHED buff- characters via EPIC CHALLENGE — 1CP core strat granting its melee
140	Backfield 48" autocannon platform — BOND TO THE CRUSADER (Crusader's Duty Bondsman = +1 to hit -> BS2+, 8 shots): consistent anti- infantry/light removal that fills the list's anti-scorer gap. Survivable OC6
75	12" anti-Deep-Strike dome (vs BA/SW/GSC/deep-strike alphas) + Hidden home-holder. Allies take no enhancement. (75 confirmed from Scott Ketcham's Tacoma roster.)

Why	
-----	--

Re-roll the number of Attacks (shots) of a weapon — huge on the Volcano lance (D3 shots) and plasma decimator (D6+3), turning low shot-rolls into full salvos. The shooting-dominant enhancement.

Castellan -> T13: pushes S12-13 anti-tank (rail / ferrumite / lascannon / Caladius / thermal) from wounding on 4+ to 5+ — survivability for the second Volcano platform.

Fast dakka: 18 Deffkopta rokkits + Speshul Ammo ([Anti-Vehicle 4+] wounds T11-12 on 4s regardless of S) + Mobile Dakkastorm (+2 S). ~1 Knight/turn once ~~kontas range in: out-BODIES + out-~~
~100-165 bodies (Mob Mentality 5++ at 10+ models, no Boyz return). 6-9 Knights CANNOT out-body / out-OC / clear it; the guns are the wrong shape. A known HARD ~~COLINTER and a top all-comers list~~
Their durability is a PAPER TIGER vs Knight guns: Land Raiders T12 W16 2+ NO invuln (Volcano ~one-shots), everything else W2-3. Flamers do nothing ~~to T11-13. Anti-Knight spikes to ~15-22~~

Mirror — same chassis (S20 shock lances both ways) + Chaos adds Dreadblades / dark rites / War Dog melee packs. User is CONFIDENT ('Chaos Knights are struggling'). ~~Not deep-verified~~

The DOMINANT T'au build in the sample (5/75). Deep-strike alpha: 4-5 Commanders + Crisis Sunforge (fusion S9 AP-4 D6), Broadside heavy rail (S12+ AP-4 Dev). ~~Twin Lance 2x Riptide ion~~

Fast MELEE alpha: 3x Skullmaster + Bloodcrusher Juggernaut cav (T6 W4, charge bonuses) + Bloodthirster (T10 W18 FLY, great axe S16 AP-3 Dev) + ~~Rendmasters Daemonic 5++~~

A SHOOTING brawl in my lane: Baneblade/Banesword/Stormsword (CHARACTER via Steel Hammer) + lascannon sponsons, or Shadowsword ~~(Volcano cannon S16 AP-4 D6+6 — one-~~

10-model Assault Terminator thunder-hammer brick (S8 AP-2 D2, ~12-16 into a no-invuln Questoris on the charge) delivered by deep-strike + Celerity ~~advance-charge. Feirros durability~~

Unsaveable Sternguard Dev (full wound-reroll vs Oath) + sticky OC10 Intercessors + an OC22 Lysander Terminator brick (NOT battle-shock-immune, but Knights ~~have no way to force a test~~) + Armour of

The heist (kill-order / positioning)

- Erase a full 6-model Destroyer unit T1 (Volcano/thermal — T6/no-invuln) — each removed = ~12 anti-Knight dmg off the table.
- Rotate the focused Knight every turn; body-block so a 2nd Knight is never offered
- Screen the Void Dragon (Anti-Vehicle 2+ wounds any Knight on 2s + heals off your hulls) away from melee.
- Lancer duels/pins the Nightbringer (4++ trades favourably; keeps the Dev scythe off a Questoris).
- Focus-fire ONE C'tan per turn to the floor (chip is refunded —
- Concentrate ALL fire on ONE Monolith/turn — remove it outright (~27-33 focused beats ~2 reanim); never chip.
- Kill the Silent King early (reroll-1s + move engine, killable T10 W16).
- Rotate every turn: the Monoliths are M8 slow — kite and out.
- Kill the STORM SPEEDER THUNDERSTRIKE first (Volcano) — it's the +1-to-wound MARK engine that makes the plasma volume lethal; remove it and the alpha drops from 'dead Knight' to 'chunked'.
- Deny the 9" bubble: deploy behind LOS blockers >24" back.
- Out-OC: an OC10 Knight beats a whole OC5-8 brick on any objective — don't try to table the bricks, out-hold them.
- Delete the Repulsor (W16, dead in a turn), Eradicators + Sternguard + Scouts (W2-3) with volume guns.
- Never feed a Knight into a brick's charge — shoot OUT at -1 or
- Lancer counter-charge: its 4++ survives the hammers a Questoris can't; hold it to trade INTO a landed brick.
- BRICK-WALL CAVEAT: assassinating Logan/Ragnar/Librarians is only MARGINAL — it doesn't collapse a faceless 4++ wall. Kill a multiplier only if it strips a real buff; otherwise don't over-commit
- Deny the alpha, don't fight it: layered chaff/bubble-wrap so DC land 9"+ out, eat overwatch, can't reach T2. Castle T1-2.
- Avenger gatling OVERWATCH the drop (A18 S6 AP-2 into 2W-T4 DC) thins it before it swings.
- Lancer + EPIC CHALLENGE (1CP): charge the DC/Sang-Guard
- Refuse OR kill Magnus: screen and body-block his 14"+Time-Flux threat with an Armiger, OR dump a turn of Volcano+gatling into him (4++ + Impossible Form -1Dmg stretches it to ~2 turns).
- Keep Ion Shields up — the rest of the list literally lacks the S/AP
- Kill the casters/character support to throttle the MW; screen the teleport (Navigator dome).
- Lancer counter-charge + assassinate a Grand Master/Librarian; out-OC (their bodies are few/OC1).
- NEEDS A FULL PASS before LSO — treat as provisional
- T1: Lancer + a Volcano into VASHTORR before he beds into the Defiler's 3" Lone-Op bubble — one kill, two problems (he's the assassin AND the Defiler's +2 S battery).
- Kill the Lord Discordant next (T9 W10 4++) to shut off the free MW + wound-reroll enabler

- CONCEDE Fulgrim: body-block his lane with an Armiger/wreck so he reaches ONE target/turn, never the same Knight twice. Do NOT Rotate vs him (useless in melee) and do NOT try to kill him.
- T1-2: shoot the SUPPORT melee off before it connects — Defiler (5++ no-1-to-hit dies to concentrated Volcano/thermal) then
- Kill the two Scourge units (8 of 13 lances) first, then the Ravager (Volcano one-shots) and Lady Malys.
- Rotate the focused Knight (make their lances fail on 1/2, not 2/3).
- Contest-don't-chase: they out-spread me on Recon with ~90
- Volume guns (Avenger A18 / RFBC / plasma) into the Custodian bodies — do NOT Volcano a W3 Custodian (overkill); save Volcano/thermal for the Caladius + characters.
- Lancer SWEEP (A10 S10 AP-2 D3) chews Custodes squads (wounds T6 on 2+)
- Never expose a lone Questoris to a 9" Beserk drop-charge (re-rollable via Yield Points): screen with the Armiger, hug terrain, keep big Knights back T1-2.
- Kill BOTH Land Fortresses T1-2 (T12 W16 no-invuln — Volcano one-shots) -> removes their entire anti-tank: then their
- Focus-kill the no-invuln Emissaries at RANGE (Volcano/thermal one-shot); grind the 4++ Assimilators.
- OC15 anchors mean the primary is a KILL-RACE, not an OC race — I must physically remove the anchoring Norn to take its objective
- Kill the HAMMERHEADS (2 railguns, T10 W14 NO invuln — Volcano deletes one/turn) + the Sunforge fusion suits (T5 W4) EARLY.
- Deny the Kauyon+markerlight alpha turn: terrain/reserves/LoS so they can't focus an un-Rotated Knight
- Range-deny: Heavy arc rifle wants 15" (Rapid Fire 2 doubles its shots); Kataphrons are M5" SLOW. Deploy behind terrain, stay outside 15" BR1, Rotate the exposed Knight.
- Win the race on ONE brick: Kataphrons have NO invuln/FNP -> dump all guns + a charge to remove a 6-model brick BR1-2 (cuts
- Rotate-cycle to survive the focus (they kill a non-Rotated Knight; save one with the 4++).
- Kill the tough hulls (Kill Rigs T10 W16, Wazdakka, Trukks) with the big guns — the koptas you can't out-clear.
- Lancer contest/distraction (a 'distraction carnifex' that forces
- No reliable heist — ACCEPT it as a feature of 40k, not a list flaw.
- Play the mission, minimise the loss margin, and hope to dodge it in the Swiss.
- Do NOT warn the list to patch this at the cost of the 90% you
- Kill BOTH Land Raiders T1-2 (Volcano/thermal — no invuln) -> strips their army fast.
- Respect the 12" flamer bubble — space >12" and their anti-Knight collapses to ~2-4.
- Grind the W2-3 bricks off with volume: out-durable + out-gun

- Mirror fundamentals: Rotate, out-shoot with the 2 Castellans, Lancer duels their Lancer/War Dogs.
- Out-OC with the Questoris; kill their gun-Knights first (Volcano trades up).
- ~~PRELIMINARY — user-confident, low priority. Full pass only if it~~
- NAVIGATOR DOME IS LOAD-BEARING: the 12" anti-Deep-Strike bubble denies the Sunforge/Crisis 9" drop — the single biggest swing in the matchup. Deploy it central.
- Kill the Broadsides + Riptides at range (Volcano/plasma) before markerlights stack; ~~delete Pathfinders (the mark engine) with the~~
- Shoot the Bloodcrushers (T6 W4, no armour help — gatling/plasma/RFBC) OFF before they charge; each un-charged Juggernaut pack is ~0 threat.
- Screen the Bloodthirster's lane; Lancer DUELS it (4++ trades favourably, S20 one-rounds a wounded 'Thirster) rather than
- Win the gun duel: 2x Volcano (S18) out-ranges/out-damages their superheavies — delete the Shadowsword (the one thing that one-shots you) FIRST, then the lascannon platforms.
- Rotate vs the alpha; hull-down T1; their artillery is indirect (~~worse into a moving Knight in cover~~)
- Screen the deep-strike (Navigator dome) + shoot the hammer brick BEFORE it lands (Avenger/RFBC into 2W-2+ Terminators — volume forces the 4++).
- Lancer counter-charges the landed brick (4++ survives hammers a Castellan can't); ~~never feed a Questoris into its~~
- Navigator dome (12" anti-Deep-Strike) blunts his Teleport-Homer / Land-Speeder deep-strike alpha.
- BREAK the Oath convergence: Volcano/thermal the Land Speeders (deep-strike enablers) + the Sternguard FIRST; ~~firepower-as-denial strips his soft OC~~

Kill-priority
Lokhust Destroyer units -> Reanimators -> soft characters (NOT the Void Dragon).
None of the 3 C'tan get tabled — out-hold. Snipe Szeras / Skorpekh Lords if they lose Lone-Op screening.
One Monolith at a time -> Silent King -> the rest.
Storm Speeder Thunderstrike (mark engine) -> Black Knight packs -> ATVs -> Scouts.
Repulsor -> Eradicators -> Sternguard -> Scouts (the killable scorers; ignore the bricks).
Thunder-hammer Assault Terminators -> buff characters only if it strips a live multiplier.
Lemartes -> Sanguinary Priests -> Chaplains (the buff engine) -> Death Company as it lands.
Magnus (or refuse) -> Sorcerers (the ritual engine) -> Rubric/Scarab bodies.
Casters/characters -> Paladins/Terminators. (Provisional.)
Vashtorr -> Lord Discordant -> Defiler -> killable scorers.

Defiler -> Flawless Blades -> Noise Marines / Infractors (NOT Fulgrim).
Scourges -> Ravager (lances) -> Lady Malys -> Raiders/Venoms.
Caladius (their one gun) -> characters -> bodies with volume.
Land Fortresses -> Berehk / Kahl -> Beserks with volume.
Emissaries (no-invuln) -> Neurotyrant / Zoanthropes -> Assimilators (grind).
Hammerheads (railguns) -> Sunforge (6 fusion) -> Riptides/Ghostkeels -> markerlight Pathfinders.
One Kataphron brick at a time -> Cawl/Manipulus (if reachable).
Kill Rigs -> Wazdakka -> Trukks (koptas are un-clearable — don't chase).
n/a — you cannot clear enough.
Land Raiders -> Vulkan / multi-meltas -> infantry.

Their gun-Knights -> War Dog packs. (Provisional.)
Broadsides / Riptides (rail+ion) -> Sunforge fusion suits -> markerlight Pathfinders -> Commanders.
Bloodthirster (or screen) -> Bloodcrushers pre-charge -> Skullmasters / Rendmasters.
Shadowsword (Volcano cannon) -> lascannon superheavies -> artillery -> Leontus.
Repulsor/Ballistus (lascannon) -> hammer brick as it lands -> Sternguard -> Scouts.
Land Speeders (enablers) -> Sternguard (unsaveable Dev) -> break the brick's character support.
