

ADEPTA SORORITAS

All-Comers Tournament Battle Plan · Champions of Faith + Sacred Champions · LOCK: DISRUPTION

Version 1.0 · 2026-07-27

Derived from the current 11E meta (5 factions / 7 archetypes) and validated with the mathhammer engine. Points are exact (MFM). All rules verified against 11E sources.

1 · The Army List

BEST Sisters v2 - Champions of Faith + Sacred Champions (all-comers) — 1985/2000 pts

Detachments: Champions of Faith (2DP, Disruption) + Sacred Champions (1DP, Take-and-Hold). Rules stack army-wide.

- **Morvenn Vahl [1]** 200 pts
- **Paragon Warsuits [3]** 210 pts · 3x Multi-melta
- **Retributor Squad [5]** 125 pts · 4x Multi-melta
- **Palatine [1]** 65 pts · Triptych of Judgement
- **Imagifier [1]** 65 pts
- **Castigator [1]** 165 pts
- **Immolator [1]** 110 pts
- **Immolator [1]** 110 pts
- **Dominion Squad [10]** 110 pts · 4x Meltagun
- **Dominion Squad [10]** 90 pts · 4x Flamer
- **Retributor Squad [5]** 105 pts · 4x Heavy bolter
- **Celestian Sacresants [10]** 150 pts
- **Canoness [1]** 85 pts · Sanctified Amulet
- **Dogmata [1]** 45 pts
- **Battle Sisters Squad [10]** 100 pts
- **Battle Sisters Squad [10]** 100 pts
- **Zephyrim Squad [5]** 75 pts
- **Seraphim Squad [5]** 75 pts

Attachments (Leader + Support per unit, Core 19.01)

- **Vahl → Paragon Warsuits** — re-roll Hits & Wounds (her unit only) + Righteous +1 BS. The melta hammer.
- **Palatine [Triptych of Judgement] + Imagifier → Multi-melta Retributor** — Lethal Hits + ignores cover + the whole unit becomes Sv 2+/4++. Durable 2nd anchor-killer.
- **Canoness [Sanctified Amulet] + Dogmata → Celestian Sacresants** — anti-Deep-Strike bubble + +1 OC on a 4++ / Holy-Quest (+1 BS/WS) mid-board holder.

2 · How the army works — SOFTEN, then DELETE

Naked Sisters melta into cover is useless (~4.6 dmg vs a Land Raider). The list wins by softening a target first, army-wide, then shooting it with buffed melta (~17.8 — one-shots it). The enablers ARE the anti-tank.

- **1. Strip cover:** Immolator "Purge & Cleanse" (auto-hits with Immolation Flamers) → target loses Benefit of Cover for the whole army. ×2 targets/turn.
- **2. Improve AP:** Castigator "Rites of Castigation" → +1 AP for every Sororitas gun into that target. ×1 target/turn.
- **3. Buff the shooter:** Vahl re-roll Hits+Wounds + Righteous Purpose +1 BS on the Paragons = near-auto-hitting, re-rolling melta.
- **4. Cover-immune backup:** Palatine + Triptych on the MM Retributor → that unit ignores cover on its own, freeing an Immolator strip for another target.

Per-turn sequence: Immolators shoot first (strip cover) → Castigator marks the key target (+1 AP) → Vahl+Paragons delete anchor A → MM-Retributor + a melta Dominion delete anchor B → flamers / heavy bolters / jump clear chaff and screen. Spend a Miracle die for a clutch melta WOUND on a high-T target.

3 · Mathhammer cheat-sheet (full hit→wound→save chain)

Anti-tank (buffed = softened target, half range)

- **Vahl+Paragons (6 MM) —** Land Raider T12/2+ : 17.8 (kills 16W) · Monolith T13/2+ : 17.8 (81%) · Deathwing 2+/4++ : 14.3 (~3.5 Termies)
- **C'tan T11/3+/4++ , -1 Damage —** 7.3 of 16W even fully buffed → DON'T bother, play the mission

Anti-horde vs 20 Ork Boyz (T5 W1 5+) — dead/turn

Castigator 14.6 + 2× Immolation Flamers 7.8 + flamer Dominion 4.7 + heavy-bolter Retributor 6.7 + Zephyrim 3.1 ≈ 37 dead Boyz/turn (break blobs off objectives).

Durability — how fast my girls die (models lost/turn)

- **Cheap bodies evaporate to VOLUME:** one Boyz mob or a 10-pyreblaster wall WIPES a 10-Sister squad (even the 4++). Battle Sisters are screens / traders / backfield OC — never front-line, never inside 12" of flamers.
- **Imagifier 2+/4++ brick ≈ 1.7× tougher vs anti-tank sniping** (death rays 2.8→1.7) — its job — but volume still swamps it. Keep it BACK, sniping anchors.
- **The hammer delivers:** Paragons take only 6.0 from a full Monolith's death rays (survive), 2.7 from a Repulsor.
- **Transports are durable delivery:** an Immolator shrugs 6 kopta rokkit (4.4) and survives 3 gauss destructors — not glass, but extract value early.

4 · Disposition — LOCK DISRUPTION

In a tournament you lock ONE disposition for the whole event. Lock DISRUPTION: it is favoured against 4 of the 6 boogeymen and suits this mobile, mission-first list. Your MISSION is then set by the OPPONENT's disposition:

- **opponent Purge the Foe** → you play DELAYING ACTION (2 VP/kill + hold non-home)
- **opponent Reconnaissance** → you play SMOKE AND MIRRORS (Decoy objectives, esp. in their half; 10 VP if 4+ decoyed)
- **opponent Disruption** → you play OUTMANOEUVRE (escalating per-objective; 10 VP for THEIR home)
- **opponent Take-and-Hold** → you play DEATH TRAP (Booby-Trap terrain + kill enemies in it + hold non-home)

5 · Deployment layouts (Disruption matchups, from the Event Companion)

Universal on every layout: 6 objectives (2 home deep in each zone, 2 central in No Man's Land, 2 expansion on the flanks), 16 obscuring terrain areas, centre packed (no turn-1 cross-board LOS). Layout A is DIAGONAL in every Disruption matchup, so default your plan to a diagonal deployment; B/C vary by matchup (below) — read the letter you're given.

vs Purge The Foe (you: Delaying Action)

- **Layout A:** diagonal — opposite-corner castles, S-curve NML; long approach
- **Layout B:** horizontal — red upper / blue lower bands; mid-depth
- **Layout C:** vertical — red-left 14" / blue-right bands; flanking lanes

vs Take And Hold (you: Death Trap)

- **Layout A:** diagonal — opposite-corner castles; long approach
- **Layout B:** diagonal — strong diagonal divider, 24.25" NML band
- **Layout C:** horizontal — red top 18" / blue bottom (Dawn of War); close

vs Reconnaissance (you: Smoke and Mirrors)

- **Layout A:** diagonal — red top-left / blue bottom-right
- **Layout B:** vertical — red-left 12" / blue-right 12" bands
- **Layout C:** diagonal — big diagonal dashed divider; corner castles

vs Disruption (you: Outmanoeuvre)

- **Layout A:** diagonal — opposite-corner castles, big diagonal NML; long approach
- **Layout B:** diagonal — stepped diagonal divider; red upper-left / blue lower-right
- **Layout C:** vertical — red-left 14" / blue-right 14" bands; central objectives mid

Standing deployment for this list (all layouts): castle the Vahl+Paragon hammer + the 2+/4++ MM-Retributor brick central-rear with LOS to the mid;

Immolators + Dominions mid-forward (hull-down T1); Sacresants+Canoness hold centre with the anti-Deep-Strike bubble; Battle Sisters screen + sit home/expansion; Zephyrim/Seraphim flanks or Reserve. Then adapt to the deployment TYPE (the A/B/C letter varies per matchup — see above):
DIAGONAL = long approach, angle the hammer across the mid and rush the two central objectives; HORIZONTAL / Dawn-of-War = close, screen harder and value the anti-Deep-Strike bubble; VERTICAL = cover the board width with the jump units.

6 • Per-archetype battle plans (locked Disruption)

Salamanders flamer-brick

They lock: Recon / Purge → **You play:** Smoke and Mirrors (vs Recon) or Delaying Action (vs Purge)

- **Targets:** Soften + delete the 2 Land Raiders (Immolator strip → Castigator +1 AP → Vahl+Paragons one, MM-Retributor + melta Dominion the other), then Aggressors/Bladeguard.
- **Plan:** Do NOT walk bodies inside 12" of the pyreblasters (auto-wipe). Score kills as tempo, Decoy from range, counter-charge stragglers with Zephyrim.

Ork Kult of Speed (dakka)

They lock: Disruption / Purge → **You play:** Outmanoeuvre (vs Disruption) or Delaying Action (vs Purge)

- **Targets:** Melta Kill Rigs + Wazdakka; Deffkoptas/Flash Gitz with Castigator Blast + heavy bolters + flamers (AP-1/-2 volume, not pure AP-4).
- **Plan:** They are faster — anchor on objectives and make them come; win the grind while they trade inefficiently. Don't over-expose transports (multiple AT units bracket them over 2 turns).

Ork Green Tide (100 Boyz)

They lock: Take-and-Hold → **You play:** Death Trap

- **Targets:** The flamer game — Castigator + 2 Immolation-Flamer Immolators + flamer Dominion + heavy bolters ≈ 37 dead Boyz/turn. Kill WHOLE units to break OC. Save melta for Ghazghkull / wagons.
- **Plan:** Boyz cluster in terrain → Booby-Trap those areas + clear the blobs there for double VP, and dodge the OC race. NEVER get charged — screen, Overwatch flamers, fall back + shoot, hold with Sacresants (4++).

Necron Monoliths (3× T13, OC8, slow)

They lock: Disruption → **You play:** Outmanoeuvre

- **Targets:** Do NOT dogpile a Monolith. Kill the Lokhust / Silent-King support / Ophydians; deny their scoring.

- **Plan:** They are M8" and only three models — out-maneuver them, grab the objectives they can't reach, race their home (10 VP). Screen Ophydian Deep Strike with the Amulet bubble.

Necron C'tan (4× T11, -1 Damage)

They lock: Purge / Recon → **You play:** Delaying Action (vs Purge) or Smoke and Mirrors (vs Recon)

- **Targets:** IGNORE the C'tan (un-killable — 7.3 even fully buffed). Melta/kill the killable enablers: Lychguard, Lokhust, Reanimator, Plasmancer, characters (2 VP each on Delaying Action).
- **Plan:** Their Purge list farms your dead units — feed them NOTHING. Keep fragile units out of C'tan + Drain-Life (6" mortal) range; hold central + expansion while the slow C'tan sit.

Dark Angels Deathwing (2+/4++ bricks, OC1)

They lock: Take-and-Hold → **You play:** Death Trap

- **Targets:** Melta works on the W4 Terminators (multi-damage past the 4++) — chip a softened brick, but don't over-commit. Kill the Sternguard / Eradicators / Repulsor / Scouts (the scoring pieces).
- **Plan:** The bricks are near-immortal but OC1 — OUT-OC them: flood the non-home objectives (4 VP) with bodies. SCREEN the Deep Strike hard with the Sanctified Amulet — deny the teleport and the bricks walk slowly into your guns.
